Where will they go when the fields turn to black glass, They will not thrive.They do not deserve such a fate.What a rich Biodiversity we have in rural Lincolnshire but we will no longer be rural and we will not sustain them.How can one justify this urbanisation of our arable land?

Bird list of my observations in fields in and near the designated Mallard Pass Solar Installation 2020-2021 by Pauline Crampin

1. Barn owl
2. Little egret
3. Kingfisher
4. Yellowhammer
5. Skylark
6. Stonechat
7. Heron
8. Swift

Subject: Synac old mitigating planting to hide installation

FAO Ben Chan

This planting will take another 20 years before it hides anything of Ryhall Substation and so it will be for the solar panels, useless for 15 years.
