

I strongly object to this planning application for many reasons.

Firstly the scale of the project is out of proportion for our area.

I choose to live in the countryside where I get to walk my dogs, breathe fresh air and look after my mental health.

There are many more options for sighting solar panels that would not take up valuable agricultural land that can and should be considered.

The shear scale of disruption to our lives whilst construction took place is unacceptable. The roads and infrastructure are not designed for this level of disruption.

The list is endless and none of it in favour of bringing this monstrosity of a development to our green and pleasant land.

I strongly object to this solar farm.
