

Submission ID: 18073

The written representations REP2-074 to REP2-091 made by Mallard Pass Action Group are thorough and honest, backed up by robust evidences. They should be accorded maximum weight in the overall planning balance. There is no proven justification to authorise this scheme that has no benefits evidenced by MPSFL that will outweigh the destruction of this rural location. Localism should matter. I request this proposal should not proceed.
