

RE: Mallard Pass Solar Project

Name: Sally Jane Threapleton

Address: [REDACTED]

ASI Property ID: 13

Our property was visited as part of the Accompanied Site Inspection on 18th August 2023. However, during the inspection, there was not opportunity given for our views and concerns to be raised to the attendees.

We have previously commented on the huge scale of the environmental and aesthetic impact of the planned site; however, we would also like to raise more individual lifestyle concerns that we have.

My husband, [REDACTED]

[REDACTED] He is a radio amateur and has been a member of the Amateur Radio Society for many years. His radio has always been an important way for him to communicate with his friends, and global contacts, which he has habitually done daily for decades.

The planned solar panels will be in the adjacent field to his radio antenna system, which is highly sensitive to interference. He is now very worried about the impact of the solar panels on his radio equipment. Without being able to maintain this lifelong hobby, he will be cut off from his friend group, [REDACTED] this route to keep in contact with others has become increasingly important to him. He simply would be lost without it.

Kind regards,

Sally Threapleton
