Dear sir,

I have already submitted my objections several times to this project. I would ask you to look at the numerous points that I have raised each time about how destructive this project is of a highly productive and beautiful area of agricultural land in Lincolnshire and Rutland. I would also like to add that this area has this winter suffered significant flooding already. The solar project would increase the speed of surface water run-off and add significantly to this problem. It would be likely that what was a rare event would become an increasingly likely event. Mallard Solar have absolutely no defence against this, they know that it is a solid truth, but they wish to proceed anyway.

This project is wrong on many levels as I have pointed out previously. Please add this extra heightened risk to my already large list of reasons why the project should be rejected.

Yours faithfully,
Andrew Lytle,
