

# SLOUGH MULTIFUEL EXTENSION PROJECT

Planning Inspectorate Ref: EN010129

## The Slough Multifuel Extension Order

Land at 342 Edinburgh Avenue, Slough Trading Estate, Slough

Document Ref: 1.2 – Application Guide

The Planning Act 2008

The Infrastructure Planning (Applications: Prescribed Forms and Procedure)  
Regulations 2009 – Regulation 5(2)(q)

**Applicant: SSE Slough Multifuel Limited**

September 2022

## 1.0 INTRODUCTION

### 1.1 Overview

- 1.1.0 This Application Guide (Document Ref. 1.2) has been prepared on behalf of SSE Slough Multifuel Limited (the 'Applicant'). It forms part of the application (the 'Application') for a Development Consent Order (a 'DCO'), that has been submitted to the Secretary of State (the 'SoS') for Business, Energy and Industrial Strategy ('BEIS'), under Section 37 of 'The Planning Act 2008' (the 'PA 2008').
- 1.1.1 The Applicant is seeking development consent for the extension of the consented Slough Multifuel Facility (the 'Consented Development'), an energy from waste electricity generating station, on land at the Slough Trading Estate, Slough (the 'Site').
- 1.1.2 A DCO is required for the extension (the 'Proposed Project') as it falls within the definitions and thresholds for a 'Nationally Significant Infrastructure Project' (a 'NSIP') under Sections 14(1)(a) and 15(1)(2)(a) and (c) of the PA 2008, being the extension of an onshore electricity generating station in England, which when extended will have a capacity of more than 50 megawatts ('MW').

### 1.2 The Applicant

- 1.2.1 The Applicant, SSE Slough Multifuel Limited ('SMF') is a 50:50 joint venture between SSE Thermal and Copenhagen Infrastructure Partners ('CIP').
- 1.2.2 SSE Thermal, part of the FTSE-listed SSE plc, is a leading developer, owner and operator of flexible generation, energy-from-waste, and energy storage assets, with over 600 direct employees across the UK and Ireland. SSE Thermal's vision is to become the leading provider of flexible thermal energy in a net-zero world. SSE Generation Limited was granted planning permission in June 2017 to construct the Consented Development at the Site. SSE currently operates the existing Slough Heat and Power Plant at the Slough Trading Estate through a company called Slough Heat and Power Limited.
- 1.2.3 CIP was founded in 2012 and is a fund management company specialising in offering tailor made investment in energy infrastructure assets globally, in particular within the renewable energy sector. CIP is a renewable market pioneer with involvement in some of the World's largest offshore wind projects and other major energy infrastructure projects in North-Western Europe, North America, and Asia Pacific. CIP has extensive biomass and energy from waste experience in the UK.

### 1.3 The Proposed Project Site

- 1.3.1 The Proposed Project Site (the 'Site') lies entirely within the administrative boundary of Slough Borough Council, a unitary authority, and is located either side of Edinburgh Avenue within the Slough Trading Estate (National Grid Reference SU 953 814) approximately 2.5 kilometres north west of Slough Town Centre.
- 1.3.2 The Site extends to approximately 2.8 hectares in area and was acquired by SSE in 2008. It forms part of the original Slough Heat and Power Plant site.

- 1.3.3 The Consented Development was originally consented in June 2017 under 'The Town and Country Planning Act 1990' (the 'TCPA') (under Planning Permission Refs. P/00987/051 (being a Section 73 variation of P/00987/024 and P/00987/035) and P/00987/025, P/00987/052 and P/19876/000). Construction of the Consented Development at the Site is well advanced and is currently expected to be completed by Quarter 4 2024.
- 1.3.4 A more detailed description of the Site and its surroundings is provided at Chapter 4 'Existing Site Conditions' of the Environmental Statement ('ES') Volume I (Document Ref. 6.2).

#### 1.4 The Proposed Project

- 1.4.1 The Proposed Project is an extension of the Consented Development comprising the carrying out of the following physical works (**Work No. 1** at Schedule 1 'Authorised Development' of the draft DCO, Document Ref. 2.1) to increase the efficiency and gross installed capacity of the generating station from just under 50MW to circa 60MW:
- a boiler primary air preheating system comprising heat exchanger bundles, pipework, valves, pipe supports, thermal insulation, instrumentation, cabling and containment;
  - a boiler secondary air preheating system comprising heat exchanger bundles, pipework, valves, pipe supports, thermal insulation, instrumentation, cabling and containment; and
  - mechanical modifications to the actuated stream turbine inlet control valve to allow steam capacity to be increased.
- 1.4.2 The physical works comprised in the extension are 'engineering operations' and therefore 'development' for the purposes of Section 31 of the PA 2008.
- 1.4.3 As is set out more fully in the Explanatory Memorandum (Document Ref. 2.2), it is only the extension which is the NSIP pursuant to Sections 14(1)(a) and 15(1) of the PA 2008, and the development forming part of the extension (being the Authorised Development) which requires development consent pursuant to Section 31 of the PA 2008. The Consented Development is consented and being constructed pursuant to the TCPA. It is not an NSIP, nor does it form part of one.
- 1.4.4 Separately, the extended generating station requires an ancillary authorisation to 'operate' at over 50MW pursuant to Section 36 of 'The Electricity Act 1989', and this is included within the DCO. This is further explained within the Explanatory Memorandum.
- 1.4.5 The Proposed Project also includes associated development within the meaning of Section 115(2) of the PA 2008, including temporary construction laydown areas, contractor facilities, vehicle parking and cycle storage facilities.
- 1.4.6 The Proposed Project will not increase the throughput of waste, vehicle movements, emissions or operating hours at the Slough Multifuel Facility, and will not alter the scale or external appearance of the consented buildings and structures.

- 1.4.7 A more detailed description of the Proposed Project is provided at Schedule 1 'Authorised Development' of the draft DCO and Chapter 2 'Proposed Project' of ES Volume I (Document Ref. 6.2) and the area within which the physical works are to occur is denoted by the hatched area on the Work Plan (Document Ref. 4.3).

## **1.5 The Purpose and Structure of this Document**

- 1.5.1 The purpose of this document is to list the documents (the 'Application Documents') that make up the Application submitted to the SoS. In addition, it sets out how the Application Documents submitted comply with relevant legislative and policy requirements and guidance.
- 1.5.2 The Application Guide will be updated by the Applicant, as required, during the Examination of the Application and documents that have been superseded will be clearly identified as such.
- 1.5.3 The Application Documents are listed in Section 2 of this document

## 2.0 APPLICATION DOCUMENTS

- 2.1.1 The Application Documents have been grouped into appropriate categories and each has been given its own document reference in **Table 2.1** below.
- 2.1.2 In addition to listing the Application Documents submitted, Table 2.1 also identifies where these have been provided to comply with relevant legislative and policy requirements and guidance. The legislative requirements for DCO applications are principally contained in the PA 2008, 'The Infrastructure Planning (Applications: Prescribed Forms and Procedures) Regulations 2009' (the 'APFP Regulations') and 'The Infrastructure Planning (Environmental Impact Assessment) Regulations 2017' (the 'EIA Regulations').
- 2.1.3 Regulation 5(2)(a) to (n) of the APFP Regulations lists the documents that all DCO applications must include, where applicable. Regulation 5(2)(o) allows applicants to submit other plans, drawings and sections necessary to describe the proposed development, while Regulation 5(2)(q) allows applicants to include *"any other documents considered necessary to support the application"*. The documents and plans and drawings that have been provided by the Applicant under Regulation 5(2)(q) and (o) are therefore not required by the APFP Regulations but which the Applicant consider necessary to explain the Proposed Project.
- 2.1.4 Regulation 6 sets out a number of documents that particular types of DCO applications must include. The one document listed under Regulation 6(1)(a)(l), that is relevant to the Proposed Project is *"a statement of who will be responsible for designing and building the connection to the electricity grid"*. A Grid Connection Statement is therefore provided as part of the Application.
- 2.1.5 The Application for the Proposed Project complies with the statutory requirements of the PA 2008, the APFP Regulations and the EIA Regulations. Furthermore, the Application complies with the policy requirements of the relevant National Policy Statements and applicable Government and Planning Inspectorate ('PINS') guidance, including, in particular, PINS Advice Note 6 'Preparation and submission of application documents' (December 2020).
