1008594; MNT15343; MNT4640	Scheduled Monument	Medieval	Fleet Plantation moated site	Fleet Plantation moated site. The scheduled monument includes a roughly square platform, measuring approximately 70m along each side, surrounded by a 10m wide ditch with a maximum depth of about 2m. Scattered brick and tile indicated that a 16th or 17th century building formerly stood on the site and this would have been preceded by a medieval timber building. The remains of a causeway across the moat are visible approximately mid-way along the north side.	500m study area
1003669	Scheduled Monument	Roman	Segelocum Roman town	Segelocum Roman town. The site of the Roman small town of Segelocum. Remains identified include building foundations; pavements; remains of timber buildings dating from the 1st century AD; two kilns; an oven; and building debris, coins and pottery dating from the late 1st to later 4th centuries. Aerial photographs indicate the site extends over an area of approximately 400m by 300m between the River Trent and the Mother Drain. Multiple roads are present defined by ditches on either side, creating quadrants and rectilinear sub-divisions. A short stretch of probable Roman road is recorded immediately to the south of the settlement.	3km study area
1004935	Scheduled Monument	Roman	Roman fort, south of Littleborough Lane	Roman fort, south of Littleborough Lane. The scheduled monument includes the buried remains of a Roman fort visible as cropmarks on aerial photographs which define three sides of the fort. It is situated on a low crest at the edge of a gentle slope, above the flood plain of the River Trent to the west. The known dimensions of the fort are 116m north to south and 83m west to east, covering an area of approximately 0.8ha.	3km study area

MNT10522	Roman	Features at Rampton: area 1	Features identified through archaeological evaluation – Area 1. Beneath the plough-soil was a thin, roughly circular patch of yellow and red burnt clay 750mm in diameter, surrounded by an ashy spread and interpreted as a hearth. A group of possible post-holes were also found in the south-east corner of the area. Finds suggest occupation in the C2 AD	500m Study Area
MNT10523	Iron Age / Roman	Structure at Rampton: area 2	Features identified through archaeological evaluation – Area 2. Within this area was found the stake and post holes of a wattle and daub structure defined by a large patch of clay pierced with stake holes. Two alignments of stakes were distinguished suggesting two building phases. The pottery from this area ranged from pre-Roman Iron Age to the C2nd AD.	500m Study Area
MNT10524	Iron Age / Roman	Features at Rampton : area 3-5	Features identified through archaeological evaluation – Area 3-5. This area was disturbed by four modern calf burials at a depth of 1.2m – 1.5m. The earliest feature appeared to be a circular building defined by a U-shaped gully (Area IV) and a corresponding southern arc of this gully in Area V. Only the north arc was properly excavated and revealed settings of contingent circular posts which varied between 200mm and 300mm in depth	500m Study Area

			and 100mm and 250mm in diameter. The building measured just over 6m at its widest external diameter and the foundation trench was c 300mm in depth. The entrance at the north west was 2m wide. The hearth or forge within the structure was egg-shaped and measured 750mm by 600mm. Its clay tuyere pipe was burnt red and yellow along its length. The pit was 210mm - 270mm deep and included a fragment of bronze and one of slag. Other features included a series of ditches and pits.	
MNT10525	Iron Age / Roman	Ditches at Rampton: area 6	Features identified through archaeological evaluation - Area 6. This cutting was sited to identify whether certain features continued beyond area 3 – 5. The earliest feature found was a probable pre-Roman Iron Age ditch. This had been cut by a later ditch.	500m Study Area
MNT10526	Iron Age / Roman	Ditches at Rampton: area 7	Features identified through archaeological evaluation - Area 7. This small cutting was designed to find further pre-Roman Iron Age features. This cutting revealed several ditches overlaying one another probably dating back to the pre-Roman Iron Age.	500m Study Area
