

Trying to keep purely to this project as suggested, I feel that it is very difficult to as all 4 of the large proposals which neighbour each other are very confusing to the general public as to which development starts and finishes. Speaking to people, they know about the proposed solar farms, but have no idea which one is which and where each starts/finishes.

This needs to be taken in to account at this preliminary meeting as I feel this the general public have no accurate information.

In addition, I would like a site visit to the to the north of the Gate Burton project so concerns can be looked at for the following issues that are causing concerns for this project living next to the proposed scheme-

Visual Impact

Noise

Human Health and wellbeing

Traffic and transport

Health and safety

Flooding risk

Biodiversity/ natural impact
