

Submission ID: 17468

This process for making a representation is complicated and it is difficult to follow the deadlines for the different projects.

Having the hearing in Lincoln is prohibitive as this is outside the areas of the schemes.

The current 'net zero' policy of the existing political party in power cannot be used to justify destruction of the landscape on this scale.

The bio-diversity of the areas affected will never recover from the construction of projects on this scale and the impact upon local communities during construction stage is not being considered.

I also have safety concerns with respect to safe battery storage
