

Dear sir/madam.

I write to you in the hope that you can stop this madness of the destruction of miles & miles of prime food producing farmland. The destruction of miles upon miles of hedgerows & trees, the devastation of all nature that lives within it for one of the most ineffective and destructive out of all the renewables there is.

China have a major food shortage due to them taking all their farmland for solar and now insist that all new builds have solar panels put on them when being built

Please please don't let these money grabbing people destroy our land for a quick pound, Solar Farm Owner, Toucan energy put themselves into administration after 4 years, leaving Thurrock council over 600 million pounds in debt.
