

Submission ID: 17613

I would like you to visit and inspect in depth the area on Kexby Lane adjacent to the housing and the most northern field in the project. There is a proposed construction site diagonally opposite the residences and business premises and adjacent to a sewage pumping station. Plans to demolish a vast length of hedgerows and fell some trees.

You can better view the first field site, and topography, upper Witham river, road speeds.

I would like to accompany you to explain some of our concerns.
