

Gate Burton Energy Park

Planning Inspectorate Reference: EN010131

Willingham Parish Council feel that the process is very confusing, we are not involved within this area of work and feel that it hasn't been fully explained for the general public to understand.

The large scale of the projects and the number of solar farms all proposed in our area are all happening at the same time and it's very difficult to get involved and understand which is which and at what stage each is at!

We are a rural village and it is difficult for most to get into Lincoln city centre, (not mentioning the parking charges) and to get time of work for the examination deadlines.
