

The developer has asked to be able to remove miles and miles of hedgerows as part of this development. This is a deep concern regarding the destruction of the habitat in its own right. This will destroy biodiversity.

The order also has actions for mitigation on visual impact. In this area there is no mitigation that can work because of the Lincolnshire Cliff.

We will only be able to see a sea of solar panels.

With the developer wishing to install fencing all around the development what is the developer proposing with regard to the control of vermin and rats as this will become an issue.
