ExA Q1 Responses due by Deadline [2]: [8 August 2023]

HISTORIC ENGLAND ADVICE

Q1.1.21 No Comments on these documents other than see Q1.6.36 below in respect of APP-227

Q1.6.36 We would expect the archaeological requirement (11) to also frame the process for (site specific) Written Schemes of Investigation (SS-WSI) to be submitted to LPAs post-DCO determination – with a requirement that the SS-WSI must be in accordance with outline written scheme of investigation (O-WSI) / archaeological mitigation strategy (AMS) that was submitted for the DCO determination. We also refer you to the Local Authority archaeological advisors as they would be advising the LPA's on post consent discharges to this requirement. As it stands it's unclear what process would secure curatorial oversight of the actual specific methodology for work carried out if this isn't captured in requirement 11.

Q1.7.1 We are satisfied the designated assets have been identified and addressed we refer you to the Local Authority Archaeological Advisors as regards undesignated remains.

Q1.7.2 We refer you to the Local Authority Archaeological Advisors as regards undesignated remains.

Q1.7.4 We refer you to the Local Authority archaeological advisors in the first instance as they will be advising the LPA's on post consent discharges to this requirement.

Q1.7.5 We refer you to the Local Authority archaeological advisors in the first instance as they will be advising the LPA's on post consent discharges to this requirement.

yours

Tim Allen

Team Leader Historic England
