

In total there is going to be 4 applications in this area, the applicant has stated publicly there is no connection between them however 2 of them are the same applicant!

They are using the same legal teams, and the cabling links all 4 together so cannot be described as separate applications with so much overlap and effect.

The impact of combining these together needs to be taken into account, judged as one.

The effect of the local community will be devastating with potentially well being conditions as a result as this scale is unprecedented.

The area over a period could well become a waste land with properties been vacated as unable to sell.
