

Having listened to the reports The developer cannot state the area is already industrialized there are two power stations on the distant horizon. One of which is supposed to have its water tower demolished. this in no way describes the land. The view from the B1398.is amazing it is full of Trees, Hedges, Reports seem to suggest they will want to remove trees, hedges at will. This is dreadful. and they talk of culling wildfie. what do they mean by this. The removal of deer. badgers, foxes, hares rabbits, A countryside devoid of wildlife.!! There will not be enough electricity produced during the winter in the dark winter. Why cannot solar panels be compulsory on all new houses and buildings.
