

I strongly feel I am being wholly disadvantaged throughout this examination process. I work and have young children and it is physically impossible for me to spend the time reading the sheer volume of documentation in order to participate. I don't have a computer at home and trying to read these documents on a mobile device is extremely difficult. I couldn't find the document which contains Appendix E so had to ask another interested party to send it to me. I then couldn't open it as every time I scrolled and reached page 45 (Appendix E) it crashed and closed the document, presumably due to the size of the file. I sent it to my partner to open on his device and the same thing happened, so I have been unable to review the information you have requested all parties to comment on. There are also two other deadlines this week, one tomorrow for Cottam and one on Friday for West Burton. How the public are expected to keep up with this is beyond me. The whole process is extremely complicated and confusing, made worse by the close and overlapping deadlines of each proposal. What I do know is this cumulative project will cover approximately 16 miles by 8 miles of fields, farmland and wonderful countryside in this area. Every journey I take I will see solar panels. To say that hedges will be planted and that in 15 years time we won't see them is completely lacking any empathy towards those of us who live here and will have this blight on our countryside. This will seriously affect the mental health of myself and my family and we do not want it. There are other options for renewable energy.
