

I would like to reinitiate my concerns regarding the flooding issues for the properties on Kexby Lane, having had water ingress on several occasions, I am very concerned that fields surrounding an already flood zone would be disastrous if destroyed.

As previously stated my house would sit at the side of a field designated for solar, imagine the mental impact to myself to see this from any window. It would also destroy my business housing small animals which are required by law to receive quiet time, this is my livelihood.
