Subject: Emma and Nicholas Hill owners of Hill agriculture.

Hill agriculture is a first generation farm owned by Emma and Nicholas Hill we purchased our land at auction the legal pack and our solicitors search did not inform us of these cable routes.

We gained planning permission for a new farm yard the accumulative amount of cables from Gate Burton, west Burton Cottam, Tillbridge going directly through our new farm yard will totally destroy our new farm yard and first generation agricultural business as the farm and business will simply not be able to develop over the accumulative amount of cables surely it our human right to make a living and support our family and this accumulative amount of cables will take this away from us it is simply not right.

Regards Emma and Nicholas Hill owners of Hill agriculture.
