

Submission ID: 23744

The application by the West Burton Solar Project team does not take into account the destruction and uprooting of 300 miles of ancient hedgerow or the felling of over 500 trees to make a single 7000 acre site for their ease of access and erection of solar panels.

For these reasons and also the reduction of 7000 acres of arable land used to produce food for the UK I am against this project
