

West Burton Solar Project

Supplementary Landscape Effects Tables

Prepared by: Lanpro Services
November 2023

PINS reference: EN010132
Document reference: EX1/WB8.2.1
Infrastructure Planning (Examination Procedure) Rules 2010

Approach to mitigation in the evaluation of landscape effects:

There are two ways the mitigation has been approached in Table 1 below. Firstly, embedded mitigation is applied at the construction, operation (Year 1 and Year 15) and decommissioning stages of the Scheme and is also referred to as 'primary mitigation'; and secondly, additional mitigation is applied at the operation (Year 1 and Year 15) stages of the Scheme and is also referred to as 'secondary mitigation'. Residual mitigation is also taken into consideration at the construction, operation (Year 1 and Year 15) stages of the Scheme and is also referred to as 'tertiary mitigation'. Tertiary mitigation addresses the effects that cannot be mitigated or 'designed out' as part of the Scheme. This mitigation falls within the wider land ownership of the applicant or is forming part of the management and maintenance objectives of the Scheme. At Year 15, there will be a re-evaluation of the Scheme to identify any residual landscape effects to understand where tertiary mitigation can be applied. To summarise, Table 1 below applies 'primary' and 'secondary' mitigation in the evaluation of the residual effects on the landscape receptors.

Landscape Receptors: Scoped out of the ES

The assessment of the landscape effects is undertaken on a site-by-site basis and each figure and appendix table takes this into account, where applicable, under the further subdivisions. For the assessment of potential landscape effects at the broad grained scale, there are National Scale Landscape Character Areas that were scoped out of the assessment. The over-arching reason for these receptors being scoped out is set out in Table 1 below with more detailed information contained within the individual sheets at WB6.3.8.2 ES Appendix 8.2 Assessment of Potential Landscape Effects [APP-073].

Landscape Receptors Carried Forward into the ES:

For the assessment of potential Landscape effects at a broad grained scale, there are Regional Landscape Character Areas, and a number of Local Landscape Character Areas that are taken forward into the assessment. The effects on these receptors are summarised in the tables below with more detailed information contained within the individual sheets at WB6.3.8.2 Appendix 8.2 Assessment of Potential Landscape Effects [APP-073]. There are individual contributors to landscape character at the fine-grained scale that are also carried forward into the assessment within the following sub-divisions of receptors;

- Land Use,
- Topography and Watercourses,
- Communications and Infrastructure,
- Settlements, Industry, Commerce and Leisure,
- Public Rights of Way,
- Nationally and Locally Designated Landscapes,
- Scheduled Monuments, Listed Buildings, Conservation Areas and Registered Parks and Gardens,
- Ancient Woodlands and Natural Designations.

Table 1: Assessment of Landscape Significance of Effects

Landscape Receptors	Sensitivity	Construction	Operational		Decommissioning	Construction	Operational		Decommissioning
		Magnitude	Magnitude (Year 1)	Magnitude (Year 15)	Magnitude	Landscape Effects	Landscape Effects (after construction/ year 1)	Landscape Effects (after year 15)	Landscape Effects
National Scale Landscape Character									
NCA Profile: 45 Northern Lincolnshire Edge with Coversands (NE554) (West Burton Sites)	Scoped out due to features and descriptions being too broad.								
National Scale LCA 45: Northern Lincolnshire Edge with Coversands Cable Route Corridor West Burton 1 to West Burton 2	Scoped out due to features and descriptions being too broad.								
National Scale LCA 45: Northern Lincolnshire Edge with Coversands Cable Route Corridor West Burton 2 to West Burton 3	Scoped out due to features and descriptions being too broad.								
National Scale LCA 45: Northern Lincolnshire Edge with Coversands Cable Route Corridor West Burton 3 to West Burton Power Station	Scoped out due to features and descriptions being too broad.								
NCA Profile: 48 Trent and Belvoir Vales (NE429) (West Burton Sites)	Scoped out due to features and descriptions being too broad.								
National Scale LCA 48: Trent and Belvoir Vales Cable Route Corridor West Burton 1 to West Burton 2	Scoped out due to features and descriptions being too broad.								
National Scale LCA 48: Trent and Belvoir Vales Cable Route Corridor West Burton 2 to West Burton 3	Scoped out due to features and descriptions being too broad.								
National Scale LCA 48: Trent and Belvoir Vales Cable Route Corridor West Burton 3 to West Burton Power Station	Scoped out due to features and descriptions being too broad.								

			Construction	Operational		Decommissioning	Construction	Operational		Decommissioning
Landscape Receptors		Sensitivity	Magnitude	Magnitude (Year 1)	Magnitude (Year 15)	Magnitude	Landscape Effects	Landscape Effects (after construction/ year 1)	Landscape Effects (after year 15)	Landscape Effects
Regional Scale Landscape Character										
Regional Scale LCT – 3a: Floodplain Valleys West Burton 1		Scoped out due to the distance to the Site/s.

Approach to assessment of the In Combination and Cumulative Landscape Effects

There are two ways the assessment of the In Combination and Cumulative Landscape Effects has been approached. Firstly, there are cumulative sites, which are the three areas of land forming the Site which have been assessed at the construction, operation (Year 1 and Year 15) and decommissioning stages of the Scheme. This is also referred to as 'in combination' effects. Please refer to WB6.4.8.14 ES Figure 8.14 [APP-266] and WB6.4.8.14.1 ES Figure 8.14.1 [APP-267] to C6.4.8.14.3 ES Figure 8.14.4 [APP-270]. Secondly, cumulative developments that have been assessed, to understand the effects of the Scheme in combination with other solar developments. The assessment has been undertaken at the construction, operation (Year 1 and Year 15) and decommissioning stages of the Scheme. Please refer to WB6.4.8.15 ES Figure 8.15 [APP-271] and WB6.4.8.16 ES Figure 8.16 [APP-272] and then WB6.4.8.16.1 ES Figure 8.16.1 [APP-273] to WB6.4.8.16.4 ES Figure 8.16.4 [APP-276] and then WB6.4.8.17.1 ES Figure 8.17.1 [APP-277] to WB6.4.8.17.3 ES Figure 8.17.3 [APP-279].

Assessment of In-Combination and Cumulative Landscape Effects in isolation:

Table 2 below sets out the cumulative and in-combination assessments with the landscape effects set out in Table 1 already taken into account (i.e., so if a significant landscape effect has already been identified to a receptor in Table 1 the cumulative and in-combination assessment does not double count this).

In Combination or Cumulative Landscape Effects may result from adding new types of change or from increasing or extending the effects of the main project when it is considered in isolation. For example, the landscape effects of the project may be judged to be significant when taken in their own right, but when taken together with the effects of other similar developments, the In Combination or Cumulative Landscape Effects may become less than significant from their combined effect.

Table 2: Assessment of Cumulative Landscape Significance of Effect.

			Magnitude of Change				Significance of Effect			
			Construction	Operational		Decommissioning	Construction	Operational		Decommissioning
Landscape Receptors	In Combination / Cumulative	Sensitivity	Magnitude	Magnitude (Year 1)	Magnitude (Year 15)	Magnitude	Landscape Effects	Landscape Effects (after construction/year 1). With 'primary' and 'secondary' mitigation.	Landscape Effects (after year 15) With 'primary' and 'secondary' mitigation.	Landscape Effects With 'primary' and 'secondary' mitigation.
National Scale Landscape Character										
NCA Profile: 45 Northern Lincolnshire Edge with Coversands (NE554)		Scoped out due to features and descriptions being too broad.								
National Scale LCA 45: Northern Lincolnshire Edge with Coversands Cable Route Corridor West Burton 1 to West Burton 2		Scoped out due to features and descriptions being too broad.								
National Scale LCA 45: Northern Lincolnshire Edge with Coversands Cable Route Corridor West Burton 2 to West Burton 3		Scoped out due to features and descriptions being too broad.								
National Scale LCA 45: Northern Lincolnshire Edge with Coversands Cable Route Corridor West Burton 3 to West Burton Power Station		Scoped out due to features and descriptions being too broad.								
NCA Profile: 48 Trent and Belvoir Vales (NE429)		Scoped out due to features and descriptions being too broad.								
National Scale LCA 48: Trent and Belvoir Vales Cable Route Corridor West Burton 1 to West Burton 2		Scoped out due to features and descriptions being too broad.								
National Scale LCA 48: Trent and Belvoir Vales Cable Route Corridor West Burton 2 to West Burton 3		Scoped out due to features and descriptions being too broad.
