

Submission ID: 26187

Further to my earlier submission, further proposals are coming forward covering 13000 acres with an industrial landscape within a 6 mile radius, this is cumulative impact. Can the Inquiry confirm how it plans to decide how the cumulative impact is to be decided if each Inquiry stands as a discrete decision, but has to be considered in the round ?

Secondly , why has the Inquiry allowed the applicant to make a late material change , which adds to the detrimental effect on the village with the widened service routes.

I look forward to hearing from the Inquiry.
