To who it may concern

I am waiting to you with regards to the aforementioned solar project planning process.

I consider there has not been enough time to adequately assess each of Island Green Power's massive solar developments and I have found the whole process extremely difficult to navigate and I am aware that a lot of effected residents have been unable to make submissions because of the confusing processes involved, therefore Island Green Power have gained a significant advantage.

I would also urge the inspectorate to consider all of Island Green Power's projects to be considered together as in essence they are closely linked

Kindest regards

Mark Wardle
