To whom it may concern

As a local resident, I wish to express concern about the timescales imposed by the Inspectorate for public consideration of these schemes. These two programmes appear to be running concurrently despite assurances given that they wouldn't be. Consequently, there isn't enough time to assess each scheme adequately, make submissions and attend meetings. This leads to confusion and make it less likely that proper public consultation can take place. This could lead to an unfair advantage for Island Green Power. These schemes should have a proper interval of several months between them to give interested parties the opportunity to engage properly in the process. Also, if they are both ready to be examined, why not examine them as one? This does not inspire confidence that public participation is a priority for the Inspectorate.

Regards

Alison Wood
