

THE SUCCESS OF THIS APPLICATION DEPENDS UPON THE CHANGE OF USE OF AGRICULTURAL LAND USED FOR FOOD PRODUCTION INTO A SEMI INDUSTRIAL USE. WHY DESTROY ONE INDUSTRY WITH ANOTHER BY TAKING AWAY A NATURAL ASSETT OF IMENSE VALUE TO HUMAN LIFE . WHY ARE WE NOT FORCING DEVELOPERS TO INCORPORATE PV PANELS ON ALL NEW HOUSES. WHY ARE WE NOT DEVELOPING ALL INDUSTRIAL UNITS WITH PV PANELS ON THE ROOF. WHY AREN'T WE PLACING PV PANELS ON THE HUNDREDS OF THOUSANDS OF ACRES OF LAND IN THE UK WHICH ARE NOT CAPABLE OF PRODUCING FOOD ?

In this waring world where food supplies are becoming an ever decreasing commodity, what is the justification in taking the best soils out of production ? It appears there are no sensible solutions out there. Rather than make a mad rush for expensive green energy why not be pragmatic and put nuclear fusion plants on the sites of West Burton, Cottom and High Marnham. Protect the cheap food policy of decades for the millions of people on the bread line in England.

if you want to blow your brains out with such an air brained scheme, do it somewhere else.
