Dear Planning Inspectorate,

Re; Cottam Solar Project, Gate Burton Energy Park, West Burton Solar Project, Tillbridge Solar Project

With reference to the above Development Consent Order applications, Uniper, owner of Cottam Development Centre (an operational gas fired power station) are currently in the process of discussing access rights with all four of applicants for the proposed solar projects. Uniper has reservations and concerns regarding the close proximity of the solar developments to our operational assets and as such the DCOs should not be granted until our negotiations have progressed to a satisfactory conclusion.

We would be very grateful for your acknowledgement of this email in respect of the four projects and we are happy to provide further information.

Lucy Berry
Land Manager International
