As a resident of Brampton and Lincolnshire I want to add my voice to the many who are against these schemes. How can a county as productive as Lincolnshire be considered for this sort of desecration. Our countryside needs all the help it can get to rebuild its flora and fauna not be covered over with panels that as soon as their money making potential is exploited they will be left and discarded as sea wind turbines have been. There are plenty of enormous distribution centres not too far away why can't the tops of those be utilised. I moved to this area to enjoy a rural life I try to limit my environmental footprint but most definitely do not agree with these plans. Our Prime Minister said consultation not imposition but there are so many proposals in the area that I feel we are being railroaded into this and will be made to feel grateful that perhaps just a few will be accepted, when really the whole environmental and personal impact needs a thorough review.
