

Cottam Solar Project

Supplementary Visual Effects Tables

Prepared by: Lanpro Services
July 2023

PINS reference: EN010133
Document reference: EX1/C8.2.2
Infrastructure Planning (Examination Procedure) Rules 2010

Approach to mitigation in the evaluation of visual effects:

There are two ways the mitigation has been approached in Table 1 below. Firstly, embedded mitigation is applied at the construction, operation (Year 1 and Year 15) and decommissioning stages of the Scheme and is also referred to as 'primary mitigation'; and secondly, additional mitigation is applied at the operation (Year 1 and Year 15) stages of the Scheme and is also referred to as 'secondary mitigation'. Residual mitigation is also taken into consideration at the construction, operation (Year 1 and Year 15) stages of the Scheme and is also referred to as 'tertiary mitigation'. Tertiary mitigation addresses effects that cannot be mitigated or 'designed out' as part of the Scheme. This mitigation falls within the wider land ownership of the applicant or is forming part of the management and maintenance objectives of the Scheme. At Year 15, there will be a re-evaluation of the Scheme to identify any residual visual effects to understand where tertiary mitigation can be applied. To summarise, Table 1 below applies 'primary' and 'secondary' mitigation in the evaluation of the residual effects on the visual receptors.

Visual Receptors: Scoped Out of the ES

There are Viewpoint Receptors that are scoped out of the assessment. The over-arching reason for these receptors being scoped out is set out in Table 1 below with more detailed information contained within the individual sheets at C6.3.8.3.2.2.1 to C6.3.8.3.2.2.28. There are Residential Receptors that were scoped out of the ES and they are also excluded from Table 1 below where they fall outside the 1km Study Area with more detailed information contained within the table at C6.3.8.3.3.1. There are Transport Receptors that were scoped out of the ES and they are also excluded from Table below where they fall outside the 1km Study Area for the Scheme with more information contained within the table at C6.3.8.3.4.1. There are PRow Receptors that were scoped out of the ES and they are also excluded from Table 1 below where they fall outside the 2km Study Area for the Scheme with more information contained within the table at C6.3.8.3.5.1. All tables are located within ES Appendix 8.3 Assessment of Potential Visual Effects **[APP-075]**.

Visual Receptors: Carried Forward into the ES

For the assessment of potential visual effects, there are visual receptors that are taken forward into the assessment. The effects on these receptors are summarised in the tables below, with more detailed information contained within the individual sheets at C6.3.8.3.2.3.1 to C6.3.8.3.2.3.30 and C6.3.8.3.2.4.1 to C6.3.8.3.2.4.33 Viewpoint Receptors, C6.3.8.3.3.2.1 to C6.3.8.3.3.2.8 and C6.3.8.3.4.3.1 to C6.3.8.4.3.15 Residential Receptors, C6.3.8.3.3.4.2.1 to C6.3.8.3.3.4.2.14 and C6.3.8.3.3.4.3.1 to C6.3.8.3.3.4.3.26 Transport Receptors and C6.3.8.3.3.5.2.1 and C6.3.8.3.3.5.2.5 and C6.3.8.3.3.5.3.1 to C6.3.8.3.3.5.3.12 PRow Receptors. For further detail, please refer to ES Appendix 8.3 Assessment of Potential Visual Effects **[APP-075]**. Please refer to:

- C6.4.8.11 ES Figure 8.11 **[APP-196]** to C6.4.8.13 ES Figure 8.13 **[APP-198]** for the location of the Viewpoints,
- C6.4.8.7.5 ES Figure 8.7.5 **[APP-179]** to C6.4.8.7.8 ES Figure 8.7.8 **[APP-182]** for the location of the residential receptors,
- C6.4.8.7.9 ES Figure 8.7.9 **[APP-183]** to C6.4.8.7.12 **[APP-186]** for the location of the transport receptors and
- C6.4.8.7.13 ES Figure 8.7.13 **[APP-187]** to C6.4.8.7.16 **[APP-190]** for the location of the PRow receptors.

Table 1: Assessment of Visual Significance of Effects (Bold type = Significant Effect)

		Magnitude of Change				Significance of Effect			
		Construction	Operational		Decommissioning	Construction	Operational		Decommissioning
Visual Receptors	Sensitivity	Magnitude	Magnitude (Year 1)	Magnitude (Year 15)	Magnitude	Visual Effects	Visual Effects (after construction/ year 1). With 'primary' and 'secondary' mitigation.	Visual Effects (after Year 15). With 'primary' and 'secondary' mitigation.	Visual Effects With 'primary' and 'secondary' mitigation.
Viewpoint Receptors									

Visual Receptors	Sensitivity	Magnitude of Change				Significance of Effect			
		Construction	Operational		Decommissioning	Construction	Operational		Decommissioning
		Magnitude	Magnitude (Year 1)	Magnitude (Year 15)	Magnitude	Visual Effects	Visual Effects (after construction/ year 1). With 'primary' and 'secondary' mitigation.	Visual Effects (after Year 15). With 'primary' and 'secondary' mitigation.	Visual Effects With 'primary' and 'secondary' mitigation.
Viewpoint VP01: Tillbridge Lane Cottam 1 [APP-199]	High	Very Low Short Term	Very Low Long Term	Low Long Term	Very Low Short Term	Negligible Neutral Not Significant	Negligible Neutral Not Significant	Min-Mod Beneficial Not Significant	Negligible Neutral Not Significant
Viewpoint VP02: Scmp/195/2 Cottam 1 [APP-200]	Scoped Out	PRoW network to SE of Cottam 1 and close to settlement of Scampton. No meaningful views available due to distance, topography, and intervening layering of hedgerows.							
Viewpoint VP03: Scmp/31/1 Cottam 1 [APP-201]	Scoped Out	PRoW network to south of Cottam 1. No meaningful views available due to distance, topography and intervening hedgerows, and settlement at Thorpe le Fallows.							
Viewpoint VP04: Thorpe Lane, Local Bridge Cottam 1 [APP-202]	Med-High	Medium Short Term	High Long Term	Medium Long Term	Low Short Term	Mod-Maj Adverse Significant	-Maj-Mod Adverse Significant	Mod-Maj Adverse Significant	Min-Mod Adverse Not Significant
Viewpoint VP05: TLFe/31/2 Cottam 1 [APP-203]	Med-High	Medium Short Term	High Long Term	Medium Long Term	Very Low Short Term	Mod-Maj Adverse Significant	Maj-Mod Adverse Significant	Min-Mod Beneficial Not Significant	Negligible Neutral Not Significant
Viewpoint VP06: Thorpe Lane Cottam 1 [APP-204]	Med-High	Medium Short Term	High Long Term	Medium Long Term	Low Short Term	Mod-Maj Adverse Significant	Maj-Mod Adverse Significant	Min-Mod Beneficial Not Significant	Minor-Moderate Neutral Not Significant
Viewpoint VP07: TLFe/32/1 Cottam 1 [APP-205]	Med-High	Medium Short Term	High Long Term	Medium Long Term	Low Short Term	Mod-Maj Adverse Significant	Maj-Mod Adverse Significant	Mod-Maj Adverse Significant	Min-Mod Adverse Not Significant
Viewpoint VP08: Stur/80/1 Cottam 1 [APP-206]	High-Med	Low Short Term	Low Long Term	Low Long Term	Low Short Term	Minor Adverse Not Significant	Minor Adverse Not Significant	Minor Beneficial Not Significant	Negligible Neutral Not Significant
Viewpoint VP09: Fleets Road, Stur/79/1 Cottam 1 [APP-207]	Scoped Out	Specific location at the residential edge of Sturton by Stow to west of Cottam 1. Similar view provided by Viewpoint VP08, although at closer proximity to Site/Sites.							

		Magnitude of Change				Significance of Effect			
		Construction	Operational		Decommissioning	Construction	Operational		Decommissioning
Visual Receptors	Sensitivity	Magnitude	Magnitude (Year 1)	Magnitude (Year 15)	Magnitude	Visual Effects	Visual Effects (after construction/ year 1). With 'primary' and 'secondary' mitigation.	Visual Effects (after Year 15). With 'primary' and 'secondary' mitigation.	Visual Effects With 'primary' and 'secondary' mitigation.
Viewpoint VP10: Stur/73/1 Cottam 1 [APP-208]	Medium	Medium Short Term	High Long Term	Medium Long Term	Very Low Short Term	Moderate Adverse Significant	Mod-Maj Adverse Significant	Moderate Beneficial Significant	Negligible Neutral Not Significant
Viewpoint VP11: TLFe/31/2 Cottam 1 [APP-209]	Med-High	High Short Term	High Long Term	Medium Long Term	Low Short Term	Mod-Maj Adverse Significant	Major Adverse Significant	Mod-Maj Adverse Significant	Minor Adverse Not Significant
Viewpoint VP12: Camm/31/1 Cottam 1 [APP-210]	Med-High	High Short Term	High Long Term	Medium Long Term	Low Short Term	Mod-Maj Adverse Significant	Major Adverse Significant	Moderate Beneficial Significant	Minor Adverse Not Significant
Viewpoint VP13: Fleets Lane, Stow Pasture Cottam 1 [APP-211]	Medium	Medium Short Term	High Long Term	Medium Long Term	Low Short Term	Moderate Adverse Significant	Mod-Maj Adverse Significant	Moderate Adverse Significant	Minor Adverse Not Significant
Viewpoint VP14: Ingham Road Cottam 1 [APP-212]	Med-High	Low Short Term	Low Long Term	Low Long Term	Very Low Short Term	Minor Adverse Not Significant	Minor Adverse Not Significant	Minor Beneficial Not Significant	Negligible Neutral Not Significant
Viewpoint VP15: Squire's Bridge Cottam 1 [APP-213]	Med-High	Medium Short Term	High Long Term	Medium Long Term	Low Short Term	Mod-Maj Adverse Significant	Maj-Mod Adverse Significant	Moderate Adverse Significant	Minor Adverse Not Significant
Viewpoint VP16: Bridleway Camm/31/1 and Ingham Road, Furze Hill Cottam 1 [APP-214]	Med-High	Low Short Term	Very Low Long Term	Very Low Long Term	Very Low Short Term	Minor Adverse Not Significant	Negligible Adverse Not Significant	Negligible Beneficial Not Significant	Negligible Neutral Not Significant
Viewpoint VP17: Stow/83/1 Cottam 1 [APP-215]	High-Med	Low Short Term	Low Long Term	Very Low Long Term	Very Low Short Term	Minor Adverse Not Significant	Minor Adverse Not Significant	Negligible Beneficial Not Significant	Negligible Neutral Not Significant
Viewpoint VP18: St Edith's Church and Coates Hall Cottam 1 [APP-216]	High-Med	Very Low Short Term	Very Low Long Term	Very Low Long Term	Very Low Short Term	Negligible Adverse Not Significant	Negligible Neutral Not Significant	Negligible Neutral Not Significant	Negligible Neutral Not Significant

		Magnitude of Change				Significance of Effect			
		Construction	Operational		Decommissioning	Construction	Operational		Decommissioning
Visual Receptors	Sensitivity	Magnitude	Magnitude (Year 1)	Magnitude (Year 15)	Magnitude	Visual Effects	Visual Effects (after construction/ year 1). With 'primary' and 'secondary' mitigation.	Visual Effects (after Year 15). With 'primary' and 'secondary' mitigation.	Visual Effects With 'primary' and 'secondary' mitigation.
Viewpoint VP19: Bridge over River Till Cottam 1 [APP-217]	Med-High	Medium Short Term	High Long Term	Medium Long Term	Low Short Term	Mod-Maj Adverse Significant	Maj-Mod Adverse Significant	Mod-Maj Adverse Significant	Min-Mod Adverse Not Significant
Viewpoint VP20: Normanby Road Cottam 1 [APP-218]	Medium	Medium Short Term	Medium Long Term	Low-Med Long Term	Low Short Term	Moderate Adverse Significant	Moderate Adverse Significant	Minor Neutral Not Significant	Negligible Neutral Not Significant
Viewpoint VP21: Stow/83/1 Cottam 1 [APP-219]	Med-High	Medium Short Term	High Long Term	Low Long Term	Very Low Short Term	Mod-Maj Adverse Significant	Maj-Mod Adverse Significant	Minor Beneficial Not Significant	Negligible Neutral Not Significant
Viewpoint VP22: Ingh/27/5 Cottam 1 [APP-220]	High-Med	Very Low Short Term	Very Low Long Term	Medium Long Term	Low Short Term	Negligible Adverse Not Significant	Negligible Adverse Not Significant	Min-Mod Beneficial Not Significant	Minor Neutral Not Significant
Viewpoint VP23: Ingh/27/5 and Ingham Road Cottam 1 [APP-221]	High-Med	Low Short Term	Medium Long Term	Medium Long Term	Very Low Short Term	Min-Mod Adverse Not Significant	Moderate Adverse Significant	Moderate Beneficial Significant	Negligible Neutral Not Significant
Viewpoint VP24: B1398 Cottam 1 [APP-222]	Scoped Out	Representative of secondary road network at the residential edge of Cammeringham. No meaningful views due to distance, topography and intervening hedgerows and woodland at Brattleby Gorse, Cammeringham Low Covert and Beck Spinney.							
Viewpoint VP25: Stow Lane and Lincoln Road Crossroads Cottam 1 [APP-223]	Scoped Out	Representative of strategic road network to east of Cottam 1. No meaningful views available due to distance, topography, and intervening hedgerows.							
Viewpoint VP26: Ingh/24/2 Cottam 1 [APP-224]	Scoped Out	Representative of bridleway network to west of Ingham. No meaningful views available due to distance, topography and intervening hedgerows and mature tree cover.							
Viewpoint VP27: Junction of Church Hill and the B1398 Cottam 1	Scoped Out	Representative of strategic north south road network running along ridgeline to east of Cottam 1. No meaningful views available due to distance, topography and intervening settlement and hedgerows.							

		Magnitude of Change				Significance of Effect

Approach to assessment of the In -Combination and Cumulative Visual Effects:

There are two ways the assessment of the In Combination and Cumulative Visual Effects has been approached. Firstly, there are cumulative sites, which are the four areas of land forming the Site which have been assessed at the construction, operation (Year 1 and Year 15) stages of the Scheme. This is also referred to as 'in combination effects'. Please refer to C6.4.8.15.1 ES Figure 8.15.1 [APP-290] and C6.4.8.15.1.1 ES Figure 8.15.1.1 [APP-291] to C6.4.8.15.1.3 ES Figure 8.15.1.3 [APP-293]. Secondly, there are cumulative developments that have been assessed, to understand the effects of the Scheme in combination with other solar developments. The assessment has been undertaken at the construction, operation (Year 1 and Year 15) stages of the Scheme. Please refer to C6.4.8.15.2 ES Figure 8.15.2 [APP-294], C6.4.8.15.2.1 ES Figure 8.15.2.1 [APP-295], C6.4.8.15.2.2 ES Figure 8.15.2.2 [APP-296], C6.4.8.15.2.3 ES Figure 8.15.2.3 [APP-297], C6.4.8.15.2.4 ES Figure 8.15.2.4 [APP-298], C6.4.8.15.2.5 ES Figure 8.15.2.5 [APP-299], C6.4.8.15.2.6 ES Figure 8.15.2.6 [APP-300], C6.4.8.15.2.7 ES Figure 8.15.2.7 [APP-301], C6.4.8.15.2.8 ES Figure 8.15.2.8 [APP-302] and C6.4.8.15.2.9 ES Figure 8.15.2.9 [APP-303].

Assessment of cumulative visual effects in isolation:

Table 2 below sets out the cumulative and in-combination assessments with the effects set out in Table 1 already taken into account (i.e. so if a significant effect has already been identified to a receptor in Table 1 the cumulative and in-combination assessment does not double count this).

Cumulative visual effects may result from either adding the effects of the project being assessed to the effects of other projects on the baseline conditions or from their combined effect. This may result from changes in the content and character of views experienced in particular places due to the introduction of new elements or removal of or damage to existing ones. For example, the visual effects of the project may be judged to be 'Significant' in EIA terms (when taken in their own right) at one viewpoint with someone looking at the view in one direction. Or alternatively someone turning through the whole 360 degrees may not see any different developments in different directions and sectors of the view, and then the visual effects of the project may be judged to be 'Not Significant' in EIA terms (in their own right).

Table 2: Assessment of Cumulative Visual Significance of Effect

			Magnitude of Change				Significance of Effect			
			Construction	Operational		Decommissioning	Construction	Operational		Decommissioning
Visual Receptors	In Combination / Cumulative	Sensitivity	Magnitude	Magnitude (Year 1)	Magnitude (Year 15)	Magnitude	Visual Effects	Visual Effects (after construction/ year 1). With 'primary' and 'secondary' mitigation.	Visual Effects (after Year 15). With 'primary' and 'secondary' mitigation.	Visual Effects With 'primary' and 'secondary' mitigation.
Viewpoint Receptors
