Cottam Solar Project

Supplementary Visual Effects Tables

Revision A (Tracked)

Prepared by: Lanpro

Services JulyNovember 2023

PINS reference: EN010133

Document reference: EX2EX1/C8.2.2 A

Infrastructure Planning (Examination Procedure) Rules 2010

Approach to mitigation in the evaluation of visual effects:

There are two ways the mitigation has been approached in Table 1 below. Firstly, embedded mitigation is applied at the construction, operation (Year 1 and Year 15) and decommissioning stages of the Scheme and is also referred to as 'primary mitigation'; and secondly, additional mitigation is applied at the operation (Year 1 and Year 15) stages of the Scheme and is also referred to as 'secondary mitigation'. Residual mitigation is also taken into consideration at the construction, operation (Year 1 and Year 15) stages of the Scheme and is also referred to as 'tertiary mitigation'. Tertiary mitigation addresses effects that cannot be mitigated or 'designed out' as part of the Scheme. This mitigation falls within the wider land ownership of the applicant or is forming part of the management and maintenance objectives of the Scheme. At Year 15, there will be a re-evaluation of the Scheme to identify any residual visual effects to understand where tertiary mitigation can be applied. To summarise, Table 1 below applies 'primary' and 'secondary' mitigation in the evaluation of the residual effects on the visual receptors.

Visual Receptors: Scoped Out of the ES

There are Viewpoint Receptors that are scoped out of the assessment. The over-arching reason for these receptors being scoped out is set out in Table 1 below with more detailed information contained within the individual sheets at C6.3.8.3.2.2.1 to C6.3.8.3.2.2.28. There are Residential Receptors that were scoped out of the ES and they are also excluded from Table 1 below where they fall outside the 1km Study Area with more detailed information contained within the table at C6.3.8.3.3.1. There are Transport Receptors that were scoped out of the ES and they are also excluded from Table below where they fall outside the 1km Study Area for the Scheme with more information contained within the table at C6.3.8.3.4.1. There are PRoW Receptors that were scoped out of the ES and they are also excluded from -Table 1 below where they fall outside the 2km Study Area for the Scheme with more information contained within the table at C6.3.8.3.5.1. All tables are located within ES Appendix 8.3 Assessment of Potential Visual Effects [APP-075].

Visual Receptors: Carried Forward into the ES

For the assessment of potential visual effects, there are visual receptors that are taken forward into the assessment. The effects on these receptors are summarised in the tables below, with more detailed information contained within the individual sheets at C6.3.8.3.2.3.1 to C6.3.8.3.2.3.3 and C6.3.8.3.2.4.1 to C6.3.8.3.2.4.3 Viewpoint Receptors, C6.3.8.3.3.2.1 to C6.3.8.3.3.4.2.1 to C6.3.8.3.3.4.2.1 to C6.3.8.3.3.4.2.1 to C6.3.8.3.3.4.2.1 to C6.3.8.3.3.4.2.1 to C6.3.8.3.3.4.2.1 to C6.3.8.3.3.5.3.1 to C6.3.8.3.3.3.5.3.1 to C6.3.8.3.3.3.1 to C6.3.8.3.3.3.1 to C6.3.8.3.3.3.1 to C6.3.8.3.3.3.1 to C6.3.8.3.3.3.1 to C6.3.8.3.3.3.1 to C6.3.8.3

- C6.4.8.11 ES Figure 8.11 [APP-196] to C6.4.8.13 ES Figure 8.13 [APP-198] for the location of the Viewpoints,
- C6.4.8.7.5 ES Figure 8.7.5 [APP-179] to C6.4.8.7.8 ES Figure 8.7.8 [APP-182] for the location of the residential receptors,
- C6.4.8.7.9 ES Figure 8.7.9 [APP-183] to C6.4.8.7.12 [APP-186] for the location of the transport receptors and
- C6.4.8.7.13 ES Figure 8.7.13 [APP-187] to C6.4.8.7.16 [APP-190] for the location of the PRoW receptors.

Table 1: Assessment of Visual Significance of Effects (Bold type = Significant Effect)

| | | | Magn | itude of Change | | | Sign | ificance of Effect | |

[EN010133/<u>EX2EX1/C8.2.2_A] November] April 2023</u>

Approach to assessment of the In -Combination and Cumulative Visual Effects:

There are two ways the assessment of the In Combination and Cumulative Visual Effects has been approached. Firstly, there are <u>cumulative sites</u>, which are the four areas of land forming the Site which have been assessed at the construction, operation (Year 1 and Year 15) stages of the Scheme. This is also referred to as 'in combination effects'. Please refer to C6.4.8.15.1 ES Figure 8.15.1 [APP-290] and C6.4.8.15.1.1 ES Figure 8.15.1.3 [APP-293]. Secondly, there are <u>cumulative developments</u> that have been assessed, to understand the effects of the Scheme in combination with other solar developments. The assessment has been undertaken at the construction, operation (Year 1 and Year 15) stages of the Scheme. Please refer to C6.4.8.15.2 ES Figure 8.15.2 [APP-294], C6.4.8.15.2.1 ES Figure 8.15.2.1 [APP-295], C6.4.8.15.2.3 ES Figure 8.15.2.3 [APP-297], C6.4.8.15.2.4 ES Figure 8.15.2.5 Figure 8.15.2.5 [APP-299], C6.4.8.15.2.6 Figure 8.15.2.6 [APP-300], C6.4.8.15.2.9 Figure 8.15.2.9 Figure 8.15.2.9 [APP-303].

Assessment of cumulative visual effects in isolation:

Table 2 below sets out the cumulative and in-combination assessments with the effects set out in Table 1 already taken into account (i.e., so if a significant effect has already been identified to a receptor in Table 1 the cumulative and in-combination assessment does not double count this).

Cumulative visual effects may result from either adding the effects of the project being assessed to the effects of other projects on the baseline conditions or from their combined effect. This may result from changes in the content and character of views experienced in particular places due to the introduction of new elements or removal of or damage to existing ones. For example, the visual effects of the project may be judged to be 'Significant' in EIA terms (when taken in their own right) at one viewpoint with someone looking at the view in one direction. Or alternatively someone turning through the whole 360 degrees may not see any different developments in different directions and sectors of the view, and then the visual effects of the project may be judged to be 'Not Significant' in EIA terms (in their own right).

Table 2: Assessment of Cumulative Visual Significance of Effect

| | | | | Ma | gnitude of Change | | | Significance of Effect | | | | |
|--|--|-------------|------------------------|-----------------------|-----------------------------------|------------------------|--|---|--|---|--|--|
| | | | Construction | | Operational | Decommissio ning | Construction | Opera | itional | Decommissioning | | |
