

I am writing to the lack of thought by the developers to the damage to wildlife, Badgers, Foxes, Hares, etc which will be severely damaged due to Fences being placed around the solar panels, this will render great damage to the environment. There is also the matter of loss of wildlife due to the removal of hedges, which should not be allowed, as well as loss of walking, horse riding which is able to continue at present. This is all due to the unprofessional attitude of the developers to our environment.
