

Hi firstly I am an interested party however my email is down at the moment - thanks

I have commented on a regular basis about the cumulative effect on the area with all the applications. Naturally I pleased that a request was made for the applicate to provide mapping of the area showing this.

I cannot believe what the applicate has provided, this is an insult to all involved. The points below I believe should have been part of this mapping.

1, Villages have not been identified or missing / relation too

2, Distances (miles / yards) from the proposals to the villages and nearest house.

3, The populations for each village needs to be provided

4, Several rings of distance should be should detailing total population within, directly affected / secondary effect Must include Gainsborough in this calclation

5, Steeple renewables (next to Gate Burton) is not shown!

6, Health coverage per population in total andf in ringed area

7, No mention of acreage for each development / total off

8, No mention of number of panels

9, No mention of BES numbers / locations

10, No mention of road closures / diversions effects

11, Omits the natural flood areas from the river Trent etc

The applicate is trying to paint a totally different picture of the accumulative effects and should be taken to task over it!

Many Thanks

Andy Johnson
