Subject: Opposition to Cottam Solar project

To who it may concern

My name is Mark Wardle and I am a resident of Marton village.

I wish to express my total condemnation of Cottam Solar project and other solar projects within the local area.

The use of farmland for such projects is completely unacceptable in today's world where food security, caring for the environment and communities is paramount.

There are far better alternatives to use for placement of solar panels and associated equipment such as domestic and commercial roofs, brown field sites and disused military bases.

If these developments were to go ahead it will be a travesty which will have long lasting impacts on rural communities, resident wildlife and food production which will last for generations.

Regards

Mark Wardle
