You don't often get email from [REDACTED]

I believe in solar energy having had solar panels on my home long before it was fashionable/expedient to do so, however I believe this plan is too extensive.

There will be a negative, visual impact on surrounding residents & it could be detrimental to their property values.

Food security will be undermined when farm land is taken out of production.

General feeling that this area is now seen as a "dumping" ground for unpopular projects. No democracy.
