You don't often get email from [REDACTED]

dear sir/madam.

I am writing in reponse to Cottam solar going before planning in the near future.

This project along with the others that are going to cover 10000 acres of productive farmland

This is land which is needed to produce food for our population. This is a project that should be put on buildings and brown areas of land, not on productive farmland. This project will not produce the required electricity in the winter, The loss to farmland wild life will be immense due to great areas of land being fenced and wildlife being trapped. The damage to the scenery is dreadful. There is no way this should proceed to try to provide green energy. this is not going to be a cheap way. It should be producing food.

Yours faithfully. Doreen Albone refernce number 20047156
