You don't often get email from [REDACTED]

I object to the application. There are better ways of producing electricity than ruining our scenery, country and ability to produce food.

All new builds should have solar panels and heating pumps as part of planning permission.

Solar depends on sun. No good at night. Turbines need wind. No good if calm.

Tide is reliable. New ideas do not need barrages or cause wildlife problems.

They are under water and can't be seen.
