Dear sir/Madam,

I would like to express my horror at the latest plans to place more solar panels to what have already been agreed to destroy the Lincolnshire landscape. I can't help but think Ed Miliband has no conception as to what happens in the countryside. Not only are communities being destroyed, wildlife is losing its environment but the nation is losing much good growing land but for what. Groups of greedy people making a lot of money then walking away back to their comfortable lives having ruined a lot of lives of other people. So how can you equate not only the above but food poverty is then on the cards with fresh food being imported. It's a nonsense so what is that doing to the carbon footprint. Wake up and see the potential devastation. Why not make it law to put solar panels on all new properties and industrial buildings. HANDS OFF our countryside.

Jill Cowan.
