Subject: Cottam Solar

[You don't often get email from [REDACTED] Learn why this is important at [REDACTED]]

I write with objections to the above development, taking land out of food production for the installation of solar is not acceptable.

How will this policy appear to other countries? it leaves us vulnerable to the import of food prices being increased as other countries take advantage of this policy. We've seen recent examples of food shortages.

Electricity green targets are currently met and can be supplied from elsewhere such as roofs first policy. the cost to install and maintain what will quickly become out of date technology, indeed we see other options being developed in the press. To transfer it to the location it is needed is expensive and risks of safety in what is industrial like kit near to communities and homes. The Impact to the environment, and health of people living these communities. Any recent gains in nature will be lost in the building and heavy lorries using country roads.

Lynn Thompson.
