MONA OFFSHORE WIND PROJECT

Glossary

Term	Meaning
Applicant	Mona Offshore Wind Limited.
Development Consent Order (DCO)	An order made under the Planning Act 2008 granting development consent for one or more Nationally Significant Infrastructure Project (NSIP).
Marine licence	The Marine and Coastal Access Act 2009 requires a marine licence to be obtained for licensable marine activities. Section 149A of the Planning Act 2008 allows an applicant for a DCO to apply for a 'deemed' marine licence as part of the DCO process. In addition, licensable activities within 12nm of the Welsh coast require a separate marine licence from Natural Resource Wales (NRW).
Mona Offshore Wind Project	The Mona Offshore Wind Project is comprised of both the generation assets, offshore and onshore transmission assets, and associated activities.
The Planning Inspectorate	The agency responsible for operating the planning process for Nationally Significant Infrastructure Projects.

Acronyms

1 Initial Statement of Common Ground Between Mona Offshore Wind Project and Isle of Man Territorial Sea Committee

1.1 Introduction

1.1.1 Overview

1.1.1.1 This Initial Statement of Common Ground (SoCG) has been prepared between Mona Offshore Wind Limited (hereafter referred to as ‘the Applicant’) and the Isle of Man Government – Territorial Sea Committee (hereafter referred to as ‘Territorial Sea Committee’), together the parties. The SoCG sets out the areas of agreement and disagreement between the parties in relation to the proposed Development Consent Order (DCO) application for the Mona Offshore Wind Project.

1.1.1.2 The Applicant has engaged with a number of Isle of Man stakeholders through consultation to date, including:

- Isle of Man Government (IoMG)
- Isle of Man Department of Environment, Food and Agriculture (IoM Defa)
- Isle of Man Department of Infrastructure (IoM DoI)
- Isle of Man Steam Packet Company (IoMSPC)
- Isle of Man Ronaldsway Airport
- Manx Fish Producers Organisation (MFPO)

1.1.1.3 The need for a SoCG between the Applicant and the Territorial Sea Committee is set out within the Rule 6 letter that was issued by the Planning Inspectorate on 07 June 2024 (PD-005). A single SoCG is being sought with the Territorial Sea Committee as the overarching body representing Isle of Man stakeholder interests. However, it should be noted that whilst there is overlap between the interest of the Territorial Seas Committee and external Isle of Man stakeholders, this initial SoCG only represents the position of the Territorial Seas Committee and cannot represent the views of the IoMSPC or MFPO.

1.1.1.4 This document is intended to provide the Examining Authority with an overview of the level of common ground between the parties. It will also be used to facilitate further discussion between the parties and will be updated during the Mona Offshore Wind Project Examination.

1.1.2 Mona Offshore Wind Project Elements under the Territorial Sea Committee’s Remit

1.1.2.1 The Territorial Sea Committee is a cross-governmental committee which was set up to manage the Isle of Man's interests following the purchase of the Territorial Seas (including hydrocarbon, coal and mineral rights) by the Isle of Man Government from the United Kingdom Government in 1991. The elements of the Mona Offshore Wind Project which may affect the interests of the Territorial Sea Committee are Work Numbers 1 and 2, covering offshore works seaward of Mean Low Water Springs (MLWS). These are detailed in Schedule 1 (Authorised Project), Part 1 (Authorised Development) of the Draft DCO (PDA-003).

MONA OFFSHORE WIND PROJECT

1.1.2.2 This SoCG covers the following topics of relevance to the Territorial Sea Committee, seaward of MLWS:

- Benthic subtidal and intertidal ecology
- Fish and shellfish ecology
- Marine mammals
- Offshore ornithology
- Commercial fisheries
- Shipping and navigation
- Seascape and visual resources
- Other sea users
- Aviation and radar
- Socio-economics.

1.1.2.3 Potential impacts upon European Sites have been assessed within the draft HRA. The Isle of Man National Nature Reserves are designated under the wildlife Act 1990 and are therefore not considered as European sites under the Conservation of Habitats and Species Regulations 2017 as amended by the Conservation of Habitats and Species (Amendment) (EU Exit) Regulations 2019. Therefore the Isle of Man Marine Nature Reserves are considered within the Environmental Statement Volumes 2 and 3. Areas of agreement and disagreement between the parties on the Isle of Man Marine Nature Reserves is covered under the topic specific tables below.

1.1.3 Overview of Mona Offshore Wind Project

1.1.3.1 Mona Offshore Wind Project is a proposed offshore wind farm located in the east Irish Sea. The Mona Offshore Wind Project will include both offshore and onshore infrastructure and consist of:

- **Mona Array Area:** This is where the wind turbines, Offshore Substation Platforms (OSPs), foundations (for both wind turbines and OSPs), inter-array cables, interconnector cables and offshore export cables will be located
- **Mona Offshore Cable Corridor and Access Areas:** The corridor located between the Mona Array Area and the landfall up to Mean High Water Springs (MHWS), in which the offshore export cables will be located and in which the intertidal access areas are located
- **Intertidal access areas:** The area from MHWS to MLWS which will be used for access to the beach and construction related activities
- **Landfall:** This is where the offshore export cables make contact with land and the transitional area where the offshore cabling connects to the onshore cabling
- **Mona Onshore Development Area:** The area in which the landfall, Mona Onshore Cable Corridor, Mona Onshore Substation, mitigation areas, temporary construction facilities (such as access roads and construction compounds), operational access to the Mona Onshore Substation and the connection to National Grid infrastructure will be located

MONA OFFSHORE WIND PROJECT

- **Mona Onshore Substation:** This is where the new substation will be located, containing the components for transforming the power supplied from the offshore wind farm up to 400 kV
- **Mona 400 kV Grid Connection Cable Corridor:** The corridor from the Mona Onshore Substation to the National Grid substation.

1.1.4 Approach to SoCG

1.1.4.1 This SoCG has been developed during the pre-examination phase and will be progressed through the examination phase of the Mona Offshore Wind Project. In accordance with discussions between the parties, the SoCG is focused on those issues raised by Isle of Man stakeholders within their responses to Scoping, Section 42 consultation and as raised through the Evidence Plan process and the Marine Navigation Engagement Forum (MNEF) that have underpinned the pre-application consultation between the parties. This SoCG also includes those issues raised by the Territorial Sea Committee and Isle of Man stakeholders during the post-application phase (i.e. relevant representations and pre-examination meetings).

1.1.4.2 The structure of this SoCG is as follows:

- Section 1.1: Introduction
- Section 1.2: Summary of SoCG
- Section 1.3: Summary of consultation
- Section 1.4: Agreements Log.

1.2 Summary of SoCG

1.2.1 Overview

1.2.1.1 This SoCG has outlined the consultation that has taken place between the parties during the pre-application and post-application phase of the Mona Offshore Wind Project. The agreement logs present the position reached on 07 August 2024 (Deadline 1).

1.2.2 Summary of Those Matters Agreed, Ongoing Points of Discussion and Not Agreed

1.2.2.1 Table 1.1 provides a summary of those matters agreed, an ongoing point of discussion or not agreed between the parties.

Table 1.1: Summary of areas agreed, ongoing points of discussion and not agreed between the parties.

Topic	Agreement status
Benthic subtidal and intertidal ecology	Agreed
Fish and shellfish ecology	Some points agreed, some ongoing points of discussion
Marine mammals	Some points agreed, some ongoing points of discussion
Offshore ornithology	Agreed
Commercial fisheries	Some points agreed, some ongoing points of discussion
Shipping and navigation	Some points agreed, some ongoing points of discussion

MONA OFFSHORE WIND PROJECT

Topic	Agreement status
Seascape and visual resources	Agreed
Other sea users	Agreed
Aviation and radar	Some points agreed, some ongoing points of discussion
Socio-economics	Some points agreed, some ongoing points of discussion

1.3 Summary of consultation

1.3.1.1 Table 1.2 below provides a summary of the consultation undertaken by the Applicant with the Territorial Sea Committee and associated Isle of Man stakeholders during the pre-application phases of the Mona Offshore Wind Project. Table 1.3 below provides a summary of the consultation undertaken by the Applicant with the Territorial Sea Committee and associated Isle of Man stakeholders during the post-application phases of the Mona Offshore Wind Project.

Table 1.2: Summary of pre-application consultation with the Territorial Sea Committee and associated Isle of Man stakeholders.

Date	Form of consultation	Stakeholder	Statutory or non-statutory engagement	Summary of consultation
Evidence Plan benthic ecology, fish and shellfish ecology and physical processes expert working group (EWG)				
29 November 2022	Meeting	IoM Defa	Non-statutory	<ul style="list-style-type: none"> Key project updates Baseline characterisation and modelling approach Initial outputs of impact assessment.
14 March 2023	Meeting	IoM Defa	Non-statutory	<ul style="list-style-type: none"> Baseline characterisation and initial outputs of impact assessment Cumulative assessment approach and initial impact assessment approach to agreement.
11 July 2023	Meeting	IoM Defa	Non-statutory	<ul style="list-style-type: none"> Discussion of statutory consultation responses Updated baselines Agreement logs.
14 August 2023	Email	IoM Defa	Non-statutory	<ul style="list-style-type: none"> Provision of a technical note presenting the approach to physical processes modelling for the application.
12 October 2023	Meeting	IoM Defa	Non-statutory	<ul style="list-style-type: none"> To present the updates to the benthic ecology baseline characterisation to address statutory consultation responses. Physical processes and fish and shellfish ecology were not discussed.
07 December 2023	Meeting	IoM Defa	Non-statutory	<ul style="list-style-type: none"> Presentation of the final impact assessment, mitigation measures and progress to agreement.

MONA OFFSHORE WIND PROJECT

Date	Form of consultation	Stakeholder	Statutory or non-statutory engagement	Summary of consultation
Evidence Plan marine mammal EWG				
09 February 2023	Meeting	IoM Defa	Non-statutory	<ul style="list-style-type: none"> Updated baseline characterisation Underwater sound modelling outputs Cumulative assessment.

MONA OFFSHORE WIND PROJECT

1.4 Agreement log

1.4.1 Overview

1.4.1.1 This section of the SoCG sets out the level of agreement between the parties. For each matter the status is identified as being either agreed, not agreed, not agreed but not material or an ongoing point of discussion, according to the criteria set out in Table 1.4 below.

Table 1.4: Position definitions and colour coding.

Position and colour coding	Definition of position
Agreed	The matter is considered to be agreed between the parties.
Ongoing point of discussion	The matter is neither agreed or not agreed, and is a matter where further discussion is required between the parties.
Not agreed, but not material	The matter is not considered to be agreed between the parties, but is not deemed material
Not agreed	The matter is not considered to be agreed between the parties.

1.4.1.2 Table 1.5 to Table 1.13 set out the level of agreement between the parties for each relevant component of the application (as identified in section 1.1.2).

MONA OFFSHORE WIND PROJECT
1.4.2 Benthic subtidal and intertidal ecology
Table 1.5: Agreement Log between the parties on benthic subtidal and intertidal ecology.

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
EIA				
TSC.BE.1	Consultation	The Applicant has undertaken adequate consultation with IoM Defa on potential impacts on benthic ecology.	Agreed	Agreed
TSC.BE.2	Consultation	Volume 2, Chapter 2: Benthic subtidal and intertidal ecology (APP-054) has had due regard to matters raised by IoM Defa through statutory and non-statutory consultation on potential impacts on benthic subtidal and intertidal ecology.	Agreed	Agreed
TSC.BE.3	Surveys	The approach to benthic ecology site-specific surveys is appropriate.	Agreed for IoM impacts	Agreed
TSC.BE.4	Baseline environment	Sufficient site-specific and desktop data has been collated to appropriately characterise the baseline benthic subtidal and intertidal ecology environment to inform the EIA.	Agreed for IoM impacts	Agreed
TSC.BE.5	Study area	The EIA study area is appropriate for the receptors and impacts assessed.	Agreed for IoM impacts	Agreed
TSC.BE.6	Assessment methodology	The sensitivity of benthic subtidal and intertidal ecology receptors has been correctly identified and sufficiently described within Volume 2, Chapter 2: Benthic subtidal and intertidal ecology (APP-054).	Agreed	Agreed
TSC.BE.7	Assessment methodology	The list of projects screened into the Cumulative Effects Assessment (CEA) in the EIA are appropriate including offshore developments within Manx territorial waters.	Agreed for IoM impacts	Agreed
TSC.BE.8	Project design envelope	Volume 2, Chapter 2: Benthic subtidal and intertidal ecology (APP-054) has identified, described and assessed the maximum design scenario for the EIA.	Agreed for IoM impacts	Agreed

MONA OFFSHORE WIND PROJECT

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
TSC.BE.9	Assessment of the effects from the Mona Offshore Wind Project alone	There will be no significant effects on benthic subtidal and intertidal ecology in EIA terms for the Mona Offshore Wind Project alone.	Agreed for IoM impacts	Agreed
TSC.BE.10	Assessment of the effects from the Mona Offshore Wind Project cumulatively with other projects	There will be no significant effects on benthic subtidal and intertidal ecology in EIA terms for the Mona Offshore Wind Project cumulatively with other plans and projects.	Agreed for IoM impacts	Agreed
TSC.BE.11	Mitigation	The mitigation measures and conditions outlined in Volume 2, Chapter 2: Benthic subtidal and intertidal ecology (APP-054) and the Mitigation and Monitoring schedule (APP-196) are appropriate and will ensure significant effects are avoided.	Agreed for IoM impacts	Agreed
Draft DCO				
TSC.BE.12	Monitoring requirements / conditions	The mitigation and monitoring outlined in Volume 2, Chapter 2: Benthic subtidal and intertidal ecology (APP-054) and the Mitigation and Monitoring schedule (APP-196) are suitable for the purposes of the DCO application.	Agreed. It is noted that the requirement for preparation and approval of an Offshore Environmental Management Plan is secured within the deemed Marine Licence (Schedule 14) of the draft Development Consent Order (PDA-003)	Agreed

MONA OFFSHORE WIND PROJECT
1.4.3 Fish and shellfish
Table 1.6: Agreement Log between the parties on fish and shellfish ecology.

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
EIA				
TSC.FSE.1	Consultation	The Applicant has undertaken adequate consultation with IoM Defa on potential impacts on fish and shellfish ecology.	Agreed	Agreed
TSC.FSE.2	Consultation	Volume 2, Chapter 3: Fish and shellfish ecology (APP-055) has had due regard to matters raised by IoM Defa through statutory and non-statutory consultation on potential impacts on fish and shellfish ecology.	Agreed	Agreed
TSC.FSE.3	Surveys	The approach to fish and shellfish ecology site-specific surveys is appropriate.	Agreed for IoM impacts	Agreed
TSC.FSE.4	Baseline environment	Sufficient site-specific and desktop data has been collated to appropriately characterise the baseline fish and shellfish ecology environment to inform the EIA.	Agreed	Agreed
TSC.FSE.5	Study area	The EIA study area is appropriate for the receptors and impacts assessed.	Agreed for IoM impacts	Agreed
TSC.FSE.6	Assessment methodology	The sensitivity of fish and shellfish ecology receptors has been correctly identified and sufficiently described within Volume 2, Chapter 3: Fish and shellfish ecology (APP-055).	Agreed	Agreed
TSC.FSE.7	Assessment methll comments odology	The list of projects screened into the CEA in the EIA are appropriate.	Agreed for IoM impacts	Agreed
TSC.FSE.8	Project design envelope	Volume 2, Chapter 3: Fish and shellfish ecology (APP-055) has identified, described and assessed the maximum design scenario for the EIA.	Agreed for IoM impacts	Agreed

MONA OFFSHORE WIND PROJECT

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
TSC.FSE.9	Assessment of the effects from the Mona Offshore Wind Project alone	There will be no significant effects on fish and shellfish ecology in EIA terms for the Mona Offshore Wind Project alone with the exception of piling impacts.	Agreed for IoM impacts	Agreed
TSC.FSE.10	Assessment of the effects from the Mona Offshore Wind Project cumulatively with other projects	There will be no significant effects on fish and shellfish ecology in EIA terms for the Mona Offshore Wind Project cumulatively with other plans and projects, with the exception of piling impacts.	Agreed for IoM impacts	Agreed
TSC.FSE.11	Assessment of the effects from the Mona Offshore Wind Project alone and cumulatively with other projects	For piling impacts, no significant effects are predicted on fish and shellfish receptors, other than cod and herring during the spawning period	TSC requires further engagement with the Applicant on potential impacts and mitigation associated with piling and underwater sound. Any updates on this position will be provided at Deadline 3	Ongoing point of discussion
TSC.FSE.12	Mitigation	The mitigation measures and conditions outlined in Volume 2, Chapter 3: Fish and shellfish ecology (APP-055) and the Mitigation and Monitoring schedule (APP-196) are appropriate and will ensure significant effects are avoided (with the exception of underwater sound).	Agreed. It is noted that the requirement for preparation and approval of an Offshore Environmental Management Plan is secured within the deemed Marine Licence (Schedule 14) of the draft Development Consent Order (PDA-003)	Agreed
TSC.FSE.13	Mitigation	The Underwater sound management strategy (UWSMS) (APP-202) is appropriate and will ensure significant effects from underwater sound are avoided.	TSC requires further engagement with the Applicant on potential impacts and mitigation associated with piling and underwater sound. Any updates on this position will be provided at Deadline 3	Ongoing point of discussion
Draft DCO				
TSC.FSE.14	Monitoring requirements / conditions	The mitigation and monitoring outlined in Volume 2, Chapter 3: Fish and shellfish ecology (APP-055) and the Mitigation and Monitoring schedule (APP-196) are suitable for the purposes of the DCO application.	Agreed. It is noted that the requirement for preparation and approval of an Offshore Environmental Management Plan is secured within the deemed Marine Licence (Schedule 14) of the draft Development Consent Order (PDA-003)	Agreed

MONA OFFSHORE WIND PROJECT

1.4.4 Marine mammals

Table 1.7: Agreement Log between the parties on marine mammals.

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
EIA				
TSC.MM.1	Consultation	The Applicant has undertaken adequate consultation with IoM Defa on potential impacts on marine mammals.	Agreed	Agreed
TSC.MM.2	Consultation	Volume 2, Chapter 4: Marine mammals (APP-056) has had due regard to matters raised by IoM Defa through statutory and non-statutory consultation on potential impacts on marine mammals.	Agreed	Agreed
TSC.MM.3	Surveys	Aerial surveys with respect to marine mammals, in particular the use of an appropriate buffer around the Mona Array Area, are appropriate	Agreed	Agreed
TSC.MM.4	Baseline environment	The baseline characterisation for marine mammals is appropriate	Agreed	Agreed
TSC.MM.5	Scoping	The scoping of impacts for the EIA for marine mammals is appropriate	Agreed	Agreed
TSC.MM.6	Study area	The EIA study area is appropriate for the receptors and impacts assessed	Agreed	Agreed
TSC.MM.7	Project design envelope	Volume 2, Chapter 4: Marine mammals (APP-056) has identified, described and assessed the maximum design scenario for the EIA.	Agreed	Agreed
TSC.MM.8	Assessment methodology	The sensitivity of marine mammal receptors has been correctly identified and sufficiently described within Volume 2, Chapter 4: Marine mammals (APP-056).	Agreed	Agreed
TSC.MM.9	Assessment methodology	The approach to underwater sound modelling and approach to assessment of underwater sound impacts is appropriate	Agreed	Agreed

MONA OFFSHORE WIND PROJECT

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
TSC.MM.10	Assessment methodology	The scoping of species to be included within the assessments is appropriate	Agreed	Agreed
TSC.MM.11	Assessment methodology	The approach to densities and reference populations is appropriate	Agreed	Agreed
TSC.MM.12	Assessment methodology	The list of projects screened into the CEA in the EIA are appropriate.	Agreed	Agreed
TSC.MM.13	Assessment of the effects from the Mona Offshore Wind Project alone	Other than unexploded ordnance (UXO) impacts, there will be no significant effects on marine mammal receptors in EIA terms for the Mona Offshore Wind Project alone.	None listed as significant - Agreed	Agreed
TSC.MM.14	Assessment of the effects from the Mona Offshore Wind Project cumulatively with other projects	Other than piling and UXO impacts, there will be no significant effects on marine mammal receptors in EIA terms for the Mona Offshore Wind Project cumulatively.	TSC requires further engagement with the Applicant on potential impacts and mitigation associated with piling and underwater sound. Any updates on this position will be provided at Deadline 3	Ongoing point of discussion
TSC.MM.15	Assessment of the effects from the Mona Offshore Wind Project alone	For UXO impacts, although a significant effect (injury) on harbour porpoise is predicted any such effects will be managed and avoided through measures set out in the outline Marine Mammal Mitigation Protocol (MMMP) (APP-207) and outline UWSMS (APP-202), which will be agreed with stakeholders post consent.	TSC requires further engagement with the Applicant on potential impacts and mitigation associated with piling and underwater sound. Any updates on this position will be provided at Deadline 3	Ongoing point of discussion
TSC.MM.16	Assessment of the effects from the Mona Offshore Wind Project cumulatively with other projects	For piling impacts, although a significant cumulative effect (in EIA terms) is predicted on bottlenose dolphin, any such effects will be managed and avoided through measures set out in the outline UWSMS (APP-202), which will be agreed with stakeholders post consent.	TSC requires further engagement with the Applicant on potential impacts and mitigation associated with piling and underwater sound. Any updates on this position will be provided at Deadline 3	Ongoing point of discussion
TSC.MM.17	Mitigation	The mitigation measures and conditions outlined in Volume 2, Chapter 4: Marine mammals (APP-056) and the Mitigation and Monitoring schedule (APP-196) are appropriate and will ensure significant effects are avoided.	Agreed. It is noted that the requirement for preparation and approval of an Offshore Environmental Management Plan is secured within the deemed Marine Licence (Schedule 14) of the draft Development Consent Order (PDA-003)	Agreed

MONA OFFSHORE WIND PROJECT

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
Draft DCO				
TSC.MM.18	Monitoring requirements / conditions	The mitigation and monitoring outlined in Volume 2, Chapter 4: Marine mammals (APP-056) and the Mitigation and Monitoring schedule (APP-196) are suitable for the purposes of the DCO application.	Agreed. It is noted that the requirement for preparation and approval of an Offshore Environmental Management Plan is secured within the deemed Marine Licence (Schedule 14) of the draft Development Consent Order (PDA-003)	Agreed

1.4.6 Commercial fisheries

Table 1.9: Agreement Log between the parties on commercial fisheries.

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
EIA				
TSC.CF.1	Consultation	The Applicant has undertaken adequate consultation with the MFPO, IOMG and IoM Defa on potential impacts on commercial fisheries.	Agreed	Agreed
TSC.CF.2	Consultation	The EIA has had due regard to matters raised by the MFPO, IOMG and IoM Defa through statutory and non-statutory consultation on potential impacts on commercial fisheries.	Agreed	Agreed
TSC.CF.3	Scoping	The scoping of impacts for the EIA for commercial fisheries is appropriate.	Agreed	Agreed
TSC.CF.4	Surveys	The approach to commercial fisheries site-specific surveys is appropriate.	Agreed	Agreed
TSC.CF.5	Baseline environment	The baseline for commercial fisheries has been appropriately characterised.	Agreed	Agreed
TSC.CF.6	Assessment methodology	The assessment methodology for commercial fisheries is appropriate.	Agreed	Agreed
TSC.CF.7	Assessment methodology	The EIA study area is appropriate for the receptors and impacts assessed	Agreed	Agreed
TSC.CF.8	Project design envelope	Volume 2, Chapter 6: Commercial fisheries (APP-058) has identified, described and assessed the maximum design scenario for the EIA.	Agreed	Agreed
TSC.CF.9	Assessment of the effects from the Mona Offshore Wind Project alone	There will be no significant effects on commercial fisheries in EIA terms for the Mona Offshore Wind Project alone.	Agreed	Agreed

MONA OFFSHORE WIND PROJECT

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
TSC.CF.10	Assessment of the effects from the Mona Offshore Wind Project cumulatively with other projects	There will be no significant effects on commercial fisheries in EIA terms for the Mona Offshore Wind Project cumulatively with other plans and projects	TSC requires further engagement with the Applicant on how cumulative impacts have been assessed and if monitoring is required. Any updates on this position will be provided at Deadline 3	Ongoing point of discussion
TSC.CF.11	Mitigation	The mitigation measures and conditions outlined in Volume 2, Chapter 6: Commercial fisheries (APP-058), outline Fisheries Liaison and Coexistence Plan (FLCP) (APP-199) and the Mitigation and Monitoring schedule (APP-196) are appropriate and will ensure significant effects are avoided.	TSC requires further engagement with the Applicant on how cumulative impacts have been assessed and if monitoring is required. Any updates on this position will be provided at Deadline 3	Ongoing point of discussion
Other Documents and Plans				
TSC.CF-12	Outline Fisheries Liaison and Coexistence Plan (FLCP)	An outline of this plan has been submitted as part of the Application (APP-199). The co-existence approach for commercial fisheries will be agreed through the development and implementation of the FLCP.	TSC requires further engagement with the Applicant on whether monitoring is required. Any updates on this position will be provided at Deadline 3	Ongoing point of discussion
Draft DCO				
TSC.CF.13	Monitoring requirements / conditions	The mitigation and monitoring outlined in Volume 2, Chapter 6: Commercial fisheries (APP-058) and the Mitigation and Monitoring schedule (APP-196) are suitable for the purposes of the DCO application.	TSC requires further engagement with the Applicant on whether monitoring is required. Any updates on this position will be provided at Deadline 3	Ongoing point of discussion

MONA OFFSHORE WIND PROJECT

1.4.7 Shipping and navigation

Table 1.10: Agreement Log between the parties on shipping and navigation.

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
EIA				
TSC.SN.1	Consultation	The Applicant has undertaken adequate consultation with the IoMSPC, IoM DoI and IoMG on potential impacts on shipping and navigation.	Agreed	Agreed
TSC.SN.2	Consultation	The EIA has had due regard to matters raised by the IoMSPC, IoM DoI and IoMG through statutory and non-statutory consultation on potential impacts on shipping and navigation.	Agreed	Agreed
TSC.SN.3	Baseline environment	The baseline for shipping and navigation has been appropriately characterised and appropriate data has been used to inform assessment.	Agreed	Agreed
TSC.SN.4	Baseline environment	The potential effects identified within the chapter represent a comprehensive list of potential effects on shipping and navigation from the Mona Offshore Wind Project.	Agreed for IoM impacts	Agreed
TSC.SN.5	Assessment methodology	The assessment methodology for shipping and navigation is appropriate (including interpretation of impact and levels of significance).	Agreed for IoM impacts	Agreed
TSC.SN.6	Assessment methodology	The navigation simulations were conducted in a fair and reasonable manner, and are appropriate for informing Volume 6, Annex 7.1: Navigational Risk Assessment (APP-098).	Agreed for IoM impacts	Agreed
TSC.SN.7	Assessment methodology	The Hazard Workshop was undertaken allowing adequate stakeholder input into the risk assessment and are reflected within the NRA conclusions laid out in Section 1.9.8 of Volume 6, Annex 7.1: Navigational Risk Assessment (APP-098).	Agreed for IoM impacts	Agreed

MONA OFFSHORE WIND PROJECT

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
TSC.SN.8	Assessment methodology	Relevant cumulative projects have been identified and are included within the shipping and navigation assessment	Agreed for IoM impacts	Agreed
TSC.SN.9	Project design envelope	Volume 2, Chapter 7: Shipping and navigation (APP-059) has identified, described and assessed the maximum design scenario for the EIA.	Agreed for IoM impacts	Agreed
TSC.SN.10	Assessment of the effects from the Mona Offshore Wind Project alone	Hazards and impacts identified as relevant to the Mona Offshore Wind Project have been assessed within the shipping and navigation assessment.	Agreed for IoM impacts	Agreed
TSC.SN.11		Hazards have been assessed as either Broadly Acceptable or Tolerable (if As Low As Reasonably Practicable (ALARP)) and there are no unacceptable hazards.	Agreed for IoM impacts	Agreed
TSC.SN.12		The mitigation measures described within Table 1.10 of Volume 6, Annex 7.1: Navigational Risk Assessment (APP-098) are appropriate. Further mitigation measures identified (but not adopted) in Table 1.43 of Volume 6, Annex 7.1: Navigational Risk Assessment (APP-098) would be disproportionate and therefore all medium risk hazards can be considered ALARP without the need for additional risk control measures.	Agreed for IoM impacts	Agreed
TSC.SN.13		The Mona Offshore Wind Project would not interfere with the use of recognised sea lanes essential to international navigation (Traffic Separation Schemes).	Note revision to increase separation with Liverpool Bay TSS	Agreed
TSC.SN.14		The Mona Offshore Wind Project could have potential significant effects on lifeline ferry services between Liverpool and Douglas. Impacts on the Heysham to Douglas route is not considered to have significant operational impacts due to the Mona Offshore Wind Project in isolation.	TSC requires further engagement with the Applicant and the respective experts. Any updates on this position will be provided at Deadline 3.	Ongoing point of discussion

MONA OFFSHORE WIND PROJECT

Reference Number	Discussion point	Applicant's Position	Territorial Sea Committee Position	Status
TSC.SN.15		All other impacts (impacts on search and rescue, radar, communications and positioning systems, etc.) would not be significant in EIA terms with proposed mitigation measures in place.	Agreed for IoM impacts	Agreed
TSC.SN.16	Assessment of the effects from the Mona Offshore Wind Project cumulatively excluding Moir Vannin Offshore Wind Farm	Hazards and impacts identified as relevant to the Mona Offshore Wind Project in combination with cumulative projects (excluding Moir Vannin) have been assessed within the shipping and navigation assessment.	Agreed	Agreed
TSC.SN.17		Hazards relating to the cumulative scenario (excluding Moir Vannin) have been assessed as either Broadly Acceptable or Tolerable (if ALARP) and there are no unacceptable hazards.	Agreed for IoM impacts	Agreed
TSC.SN.18		The mitigation measures described within Table 1.10 of Volume 6, Annex 7.1: Navigational Risk Assessment (APP-098) are appropriate. Further mitigation measures identified (but not adopted) in Table 1.43 of Volume 6, Annex 7.1: Navigational Risk Assessment (APP-098) would be disproportionate and therefore all medium risk hazards relating to the cumulative scenario (excluding Moir Vannin) can be considered ALARP without the need for additional risk control measures.	Agreed for IoM impacts	Agreed
TSC.SN.19		The Mona Offshore Wind Project in combination with cumulative projects (excluding Moir Vannin) would not interfere with the use of recognised sea lanes essential to international navigation (Traffic Separation Schemes).	Agreed for IoM impacts	Agreed
TSC.SN.20		The Mona Offshore Wind Project in combination with cumulative projects (excluding Moir Vannin) could have potential significant effects on lifeline ferry services between Liverpool and Douglas and Heysham and Douglas.	TSC requires further engagement with the Applicant and the respective experts. Any updates on this position will be provided at Deadline 3.	Ongoing point of discussion
