**Subject:** Response to ExQ1.0 - IGP Solar 21 Limited  
**Date:** 27 September 2024 17:16:42

---

Dear Gina,

Below is our written response to **ExQ1.0** in addition to the attached accompanying plan.

**IGP Solar 21 Limited:**

**What details are you able to submit, including anticipated timescales, into the Examination?**

*IGP Solar 21 Limited is aiming to submit a planning application for the proposal in Summer/Autumn 2025. At this stage of the project, the majority of the area under option is being considered for the location of the BESS, substation and other ancillary development (shaded in blue in the attached plan). The final location and configuration of these components and the detailed site layout will be informed by the results of the site surveys and technical assessments which are currently underway, feedback from key stakeholders and the local community and will also be in part dependent on how discussions with Mona Offshore Wind Farm progress.*

I would be grateful if you could please confirm receipt.

Kind regards

**Nick Bowen** | Senior Project Development Manager
