* Please provide payment reference details

4. Confirming why the Planning Inspectorate should receive the application

* Brief statement to explain why this application is, or is to be treated as, a development for which development consent is required under the Planning Act 2008

The Scheme is defined as a Nationally Significant Infrastructure Project ('NSIP') under sections 14(1)(a) and 15(1)(2)(a) to (c) of the Planning Act 2008, as the proposals comprise a generating station that would exceed 50 megawatts (MW).

As the proposed works comprise a NSIP, an application for a development consent order must be made to the Secretary of State under section 31 of the Planning Act 2008.

5. Non-technical description of the Proposed Development

* Brief non-technical description of the Proposed Development

The Rivenhall Integrated Waste Management Facility ('IWMF') is currently being constructed in accordance with planning permission granted through the Town and Country Planning Act 1990 (as amended) by Essex County Council (ECC ref: ESS/34/15/BTE, dated 26 February 2016). The planning permission allows the IWMF to generate up to 49.9 megawatts of electrical energy ('MW').

The Applicant is seeking a DCO to increase the generating capacity of the EfW which forms part of the consented Rivenhall IWMF to more than 50MW. The greater generating capacity would be achieved by implementing engineering operations to allow a greater proportion of steam to reach the electricity-generating turbine. The Proposed Development will only comprise engineering works carried out internally within the consented IWMF building. The increase in generating capacity would not require an increase in waste throughput or physical changes to the consented building envelope or external layout.
