

# TRANSCRIPT\_RIVENHALL\_ISH1\_SESSION3 \_04062024

Tue, Jun 04, 2024 2:04PM • 3:48

00:05

Okay, welcome back, everyone, the time is now 115. And I will resume the issue specific hearing for item agenda number eight.

00:13

In terms of procedural decisions, there's not been any to make today. So, I will skip very quickly on to the hearing actions.

00:24

So the first one I have is in relation to noise,

00:27

which is ultimately to

00:30

provide the source data modelling, which way the applicant to provide the source data modelling to the county council.

00:38

Also,

00:40

the applicant to provide a noise survey for the section 73 application as soon as practicable once has been fully prepared,

00:50

and engagement between the applicant and the county council on the cumulative effects with the dry solo more to plan.

01:00

Secondly, I've got the applicant to update the licences and consent schedule.

01:06

Thirdly, the applicant to provide an update on engagement with the ambulance service.

01:15

Fourth, a note to be provided by the applicant on alternatives,

01:22

particularly with those going above potentially 65 megawatts.

01:28

Fifth point is a note on decommissioning and the MPs requirements in that regard. And finally, further engagement on the section 106 definitions, etc. Between the applicant and the county council.

01:46

Does anyone have any comments on those?

01:54

Yes, the county council please.

01:58

I believe I agreed to do a written response on

02:03

on the point about

02:05

our response to sections five and six. Under the under point four. You wanted a response on 4.3? Okay, that's why Yeah, I sort of assumed that would just be a standard deadline three response to that. But that's fine. I will notice a hearing action. But thank you. Thank you very much.

02:26

Okay, anything at all from anyone else?

02:31

No. Okay. In that case, I'll come on to my closing remarks.

02:36

If I could just remind everyone, ultimately that any post hearing notes, documents and answers should hopefully be for deadline three, if at all possible. I know I did discuss briefly with the county council about one of them being at deadline for which is noted.

02:51

So unless there's anything else at all, from anyone in relation to the hearings, today, then now is your opportunity.

03:04

I'll take the lack of hands as a note. In that case. Thank you ever. Thank you so much everyone for your contributions today.

03:11

And I will close this US Pacific hearing. There is a no control hearing jufa 330. This afternoon, as far as I'm aware, unless anyone unexpected turns up there is nobody now that wishes to speak at it. So it may be a case that I open and then close it just so the parties who are attending are aware of that. But in that case, the time is now 1318 and I close the issue specific here and thank you once again everyone
