

I would like to suggest a site inspection visit to the playground at Bishopton. I note the Examining Authority have visited Mill Lane adjacent to the school but did not visit the playground located beyond the school on Cobby Castle Lane. A visit to the playground is essential to appreciate the impact of the solar panel development on the visitor experience there. The playground is a relatively recent addition to the village after many years of fundraising and its open rural outlook is a key benefit for children and carers alike.
