Morning Martin,
Mary will be visiting today and will aim for around 12 to 12.30 so it's roughly lunchtime if that works okay for you?
She will contact you directly if anything unexpected happens to change that time window.
Best wishes,
Imogen

Can you please confirm if your Landscape Consultant will be visiting today.
Regards,
Martin Philpott

Thank you for getting back to me.
Confirmation that Tuesday 12th will be fine.
Can you give me a call 20 minutes before you plan to arrive as we are at work so will travel back to meet you there.

Regards,
Martin Philpott

Dear Mr Philpott,
Thank you for getting in touch.
Apologies for the short notice, however, our Landscape Consultant will be in the area next week. They are available to come on Tuesday 12th or on the morning of Wednesday 13th.
Would either of those be suitable for you? It shouldn't require longer than a 20-

minute slot.
Kind regards,
Imogen

Subject: Hylton - Great Stainton inclusion in impact assessment photographs.
Importance: High

After my neighbour spoke with the Landscape/Planner Consultant at Bishopton Village Hall on the 24th May they found that they have only been taking assessment photographs from the Public Rights of Way

We also understand that the Landscape/Planner Consultant is required to work to a boundary of 1km from the nearest proposed Solar Panel Site.

Our property is in an elevated position less than 1 km from the proposed solar panel site. Therefor we would request that the Landscape/Planner Consultant contact us to arrange a mutually convenient time to visit our property to discuss our concerns and take photographs which can then be included in their future submission.

[REDACTED]

We look forward to receiving your prompt response.

Regards,
Martin Philpott
