

In RWE document 8.15 Post hearing submissions there is an error on page 70 it reads " [REDACTED] of Great Stainton Parish Council noted that 100% of residents of Great Stainton opposed the development. [REDACTED] acknowledged the substantial adverse impact and identified land in panel area D that they want removed as a village, where panels cannot be effectively mitigated with screening. [REDACTED] noted that it was disappointing that removal was only considered if improved technology was available and requested that high-priority areas identified in panel area D be removed from the scheme if planning consent is granted".

It should read "[REDACTED] of Great Stainton Parish Meeting noted that 100% of residents of Great Stainton opposed the development. [REDACTED] acknowledged the substantial adverse impact and identified land in panel area D that they want removed as a village, where panels cannot be effectively mitigated with screening. [REDACTED] noted that it was disappointing that removal was only considered if improved technology was available and requested that high-priority areas identified in panel area D be removed from the scheme if planning consent is granted" , which is as per my oral case and an extract of my post hearing written submission from the 16th October 2024.
