Dear Stakeholder,

I hope this email finds you well. I wanted to provide you with important information about the Helios Renewable Energy Project in North Yorkshire. We will soon be launching a statutory consultation on our project proposals in the coming weeks, and we'd like to explain how you can be part of this process.

Following feedback from our informal consultation in 2022 and additional technical assessments, we have refined our project. The project consists of solar farm west of Camblesforth and north of Hirst Courtney in North Yorkshire. This solar farm will include ground-mounted solar arrays, a battery energy storage system, and essential infrastructure to generate over 50 megawatts (MW) of electricity. The power generated will be connected to the Drax National Grid substation via an underground cable.

We will be publishing our **Statement of Community Consultation (SoCC)** tomorrow, which outlines when, where, and how local communities can participate in the statutory consultation before we submit our application. You can access the SoCC on our project website - [www.helios-renewable-energy-project.co.uk/](http://www.helios-renewable-energy-project.co.uk/).

**The consultation period is scheduled to take place from 26 October 2023 to 7 December 2023.** Documents and consultation information will be made available on the 26<sup>th</sup> October and we will write to again to explain further details about this. We will host public exhibitions in November, and we are also offering a comprehensive virtual exhibition on our project website during this period.

Further details can be found in the attached letter, newsletter which is being sent to residents close to the proposed development and on our project website [www.helios-renewable-energy-project.co.uk/](http://www.helios-renewable-energy-project.co.uk/)

I will be in touch again once we have launched the statutory consultation, please get in contact if you have any questions in the meantime. You can contact the project team at any point via the following methods:

- Visit the project website <https://www.helios-renewable-energy-project.co.uk>
- [Redacted]
- Email [info@helios-renewable-energy-project.co.uk](mailto:info@helios-renewable-energy-project.co.uk)
- Write to FREEPOST TC CONSULTATION (no further address or stamp required)

Kind regards
