

I would like to request that the Inspector takes the time to travel by car along the B1398 (Middle Street), from Hemswell Cliff to Lincoln and back. The reason that this is so important is that the views out west, north west and south west from this cliff road are designated as an Area of Great Landscape Value and should be protected as such. The landscape that you can see as you travel is the vast area of arable land that is proposed to be covered by the Tillbridge Solar farm, alongside Cottam, West Burton and Gate Burton, meaning that this AGLV will be turned into a sea of solar panels. I have attached photos of the view as it is currently.
