

Important information offered to you, has been ignored.

The placing of massive solar industrial plants as intended will cause:

The loss off valuable food producing land.

A detrimental effect on mental and physical health of those living amongst industrial solar plants. Destruction of historical villages.

A loss of valuable farming workforce and experience.

The alteration to climate in these areas.

Creation of waste/weed deserts that know one will take responsibility for.

Flooding. Environmental footprint from panels and their decay.

No attention or consideration has been given to those using and living alongside the already dangerous A631 Bawtry to Gainsborough Rd, without extra traffic from solar plants. 5 serious accidents this year, one fatal. This is a main road to Lincs and a coast Rd, it is continually flooded closed and blocked, unable to carry the huge volume of traffic.

Why are there no solar or wind industrial plants and hundreds of pylons in the Coxwolds? This was very obvious on a recent visit.
