

Why on earth would any of you think that taking away our farm land, our wildlife, our beautiful country side is a great idea for very little gain in terms of energy! You would taking away all that means so much to us all, we live in this area because it's beautiful, we love our farm land, our countryside, our wildlife, and because of greed, the greedy people want to take it all away from us and our wildlife! How is this ok, you all know it's NOT ok, none of you would want this on your door step, so why is it ok for the greedy people to do this to us?
I wish yourselves and these greedy people would listen to us all, as this isn't your home&area your destroying, it's ours!
