Subject: Request for an Issue Specific Hearing on Health and Wellbeing for the Tillbridge Solar Project Examination
Date: 02 November 2024 20:56:53

Dear Sirs

I write to reflect and comment on the heartfelt concerns raised by Interested Parties at the Open Floor Hearing on the 16th October.

Many people showed the raw emotion and real impact this scheme is already having on the lives. In light of these testimonies, the Applicant in contrast stated at the end of the Hearing, that their desk top studies and findings concluded there will be no impact on the health and wellbeing of communities. The gulf between reality and theory was evident for everyone to see. The Applicant's predictions are merely that and cannot be viewed as providing a certain outcome.

In light of this, I respectfully request that the Examining Authority allows for an Issue Specific Hearing on Health and Wellbeing to be held during the Examination so this matter can be fully explored and the implications on peoples health be openly discussed.

Kind regards

Liz Garbutt
