

Due to the scale of the proposed development it would be good to see more benefits to the local communities affected such as the provision of a network of permissive footpaths around site perimeters, connecting with existing public footpaths or minor roads.

More efforts to make the solar farms attractive to wildlife such as hedgerow creation/thickening, pond creation and managed species-rich grassland. As large areas will be fenced off then wildlife gates (badgers, hedgehogs) should be considered so that existing movement corridors are not impacted.
